The Individual and the Group Malcolm Pines, 2012-12-06 Malcolm Pines and Lise Rafaelsen The Seventh International Congress of Group Psychotherapy organized in Copenhagen by the International Association of Group Psychotherapy was one of the largest and most representative congresses on this subject that has yet been held Probably for the first time we achieved the declared aim of the International Association that of bringing together representatives of the different approaches to group psychotherapy in the same forum to allow for communication exchange and development of our relation ships Previous congresses have been less representative and it seems to augur well for the future of the Association and of it s congresses that there was this strong force and wish for unification and for exchange within the field of group psychotherapy The Congress theme The Individual and the Group Boundaries and Interrelations in Theory and Practice was chosen because it gave an opportunity once again to examine the very basis for group psycho therapy as theory and as practice The basic theme stated in the opening papers by Professor Marie Jahoda and Professor James Anthony was replayed daily with new developments and variations according to the theoretical position of each subsequent speaker

*Grounded-Encounter Therapy* L. Alex Swan,2013-10 Grounded Encounter Therapy is a discovery intervention and application approach which allows the theory which guides the process to be developed from an analysis of the situation or context rather than imposed at the outset by the therapist It is a dramatic contrast to psychological theories particularly psychoanalysis which impose a specific causal theory at the outset In GET on the other hand the theory emerges from the client defined context not the other way around The book introduces students and professionals an alternative to doing counseling and therapy Traditional therapist see what they look for and what they look for they see and what they see is what their therapeutic modalities allow them to see and what their therapeutic modalities allow them to see is what they treat
