SOFTWARE ENGINEERING CONCEPTS PRESENTATIONS LIST

Instructions:

- Group 1-5 will be presenting in the coming class (Thursday).
- Group 6-10 will be presenting in FRIDAY'S class.
- Group 11-13 will be presenting in next class after Friday.
- Students should prepare their presentations before the mentioned classes and make sure their attendance in mentioned classes otherwise will be marked ZERO.
- Presence of every group member is mandatory otherwise whole group will be marked ZERO.
- No excuse will be accepted for delay in presentation.

GROUP 1
M. ALI
M. ALI
ASFAND YAR
HAMZA ATIQ
TOPIC: WHAT IS SOFTWARE TESTING , SOFTWARE TESTING LEVELS.

GROUP 2
FARAZ SHOUKAT
HASSAN JAN
AHMAD MIR
SIMRA JEHANZEB
TOPIC: SOFTWARE QUALITY ASSURANCE (SQA) GOALS AND PROCESSES

GROUP 3
M. DANIYAL
IMAM
ZAKIN AHMAD
MUEED
TOPIC: SOFTWARE QUALITY ASSURANCE (SQA) GOALS AND PROCESSES

GROUP 4
ARYAN SAJID
DANIYAL MUSHTAQ
FAIZAN RAZA
HARIS AHMAD
TOPIC: SOFTWARE TESTING TYPES , BLACK BOX AND WHITE BOX TESTING TECHNIQUES , VERIFICATION VS VALIDATION.

GROUP 5
HAMZA ALI
MANAHIL ALI
WAHEED UR REHMAN
HURAIRA AMJAD
TOPIC: SOFTWARE TESTING TYPES , BLACK BOX AND WHITE BOX TESTING TECHNIQUES , VERIFICATION VS VALIDATION.

GROUP 6
NAVEED ALAM
EMAAN SARDAR
M. HASSAN
MOAZZAM ALI
TOPIC: SOFTWARE QUALITY CONCEPTS AND ACHIEVING SOFTWARE QUALITY

[Software Engineering Concepts Professional Software Vol 1](#)

Software Engineering Concepts Professional Software Vol 1:

Software Engineering 3 Dines Bjørner,2006-06-29 The art craft discipline logic practice and science of developing large scale software products needs a believable professional base The textbooks in this three volume set combine informal engineeringly sound practice with the rigour of formal mathematics based approaches Volume 3 is based on the maxim Before software can be designed its requirements must be well understood and before the requirements can be expressed properly the domain of the application must be well understood This book covers the process from the development of domain descriptions via the derivation of requirements prescriptions from domain models to the refinement of requirements into software designs i e architectures and component design Emphasis is placed on what goes into proper domain descriptions and requirements prescriptions how one acquires and analyses the domain knowledge and requirements expectations and how one validates and verifies domain and requirements models The reader can take an informal route through Vol 3 and this would be suitable for undergraduate courses on software engineering Advanced students lecturers and researchers may instead follow the formal route through Vol 3 and in this case Vol 1 is a prerequisite text Lecturers will be supported with a comprehensive guide to designing modules based on the textbooks with solutions to many of the exercises presented and with a complete set of lecture slides   **Software Engineering 1** Dines Bjørner,2007-06-01 The art craft discipline logic practice and science of developing large scale software products needs a believable professional base The textbooks in this three volume set combine informal engineeringly sound practice with the rigour of formal mathematics based approaches Volume 1 covers the basic principles and techniques of formal methods abstraction and modelling First this book provides a sound but simple basis of insight into discrete mathematics numbers sets Cartesians types functions the Lambda Calculus algebras and mathematical logic Then it trains its readers in basic property and model oriented specification principles and techniques The model oriented concepts that are common to such specification languages as B VDM SL and Z are explained here using the RAISE specification language RSL This book then covers the basic principles of applicative functional imperative and concurrent parallel specification programming Finally the volume contains a comprehensive glossary of software engineering and extensive indexes and references These volumes are suitable for self study by practicing software engineers and for use in university undergraduate and graduate courses on software engineering Lecturers will be supported with a comprehensive guide to designing modules based on the textbooks with solutions to many of the exercises presented and with a complete set of lecture slides   *Advanced Software Testing – Vol.1, 2nd Edition* Rex Black,2015-12-01   **Encyclopedia of Software Engineering Three-Volume Set (Print)** Phillip A. Laplante,2010-11-22 Software engineering requires specialized knowledge of a broad spectrum of topics including the construction of software and the platforms applications and environments in which the software operates as well as an understanding of the people who build and use the software Offering an authoritative perspective the two volumes of the

Encyclopedia of Software Engineering cover the entire multidisciplinary scope of this important field More than 200 expert contributors and reviewers from industry and academia across 21 countries provide easy to read entries that cover software requirements design construction testing maintenance configuration management quality control and software engineering management tools and methods Editor Phillip A Laplante uses the most universally recognized definition of the areas of relevance to software engineering the Software Engineering Body of Knowledge SWEBOK as a template for organizing the material Also available in an electronic format this encyclopedia supplies software engineering students IT professionals researchers managers and scholars with unrivaled coverage of the topics that encompass this ever changing field Also Available Online This Taylor E mail e reference taylorandfrancis com International Tel 44 0 20 7017 6062 E mail online sales tandf co uk   *Proceedings of the 8th International Congress on Environmental Geotechnics Volume 1* Liangtong Zhan,Yunmin Chen,Abdelmalek Bouazza,2018-10-10 This book gathers selected papers presented at the 8th International Congress on Environmental Geotechnics ICEG held on October 28 November 1 2018 in Hangzhou China The theme of the congress is Towards a Sustainable Geoenvironment which means meeting the needs of the present generation without compromising the ability of future generations to meet their own needs Under this theme the congress covers a broad range of topics and provides an excellent opportunity for academics engineers scientists government officials regulators and planners to present discuss and exchange notes on the latest advances and developments in the research and application of environmental geotechnics   Software Engineering Standards and Specifications S. Magee,Stan Magee,Leonard L. Tripp,1994   **Approaches to Human Geography** Stuart C. Aitken,Gill Valentine,2014-12-01 The book covers some of the traditionally most obtuse and difficult to grasp philosophical ideas that have influenced geographers geography The fact that these are presented in an inclusive and accessible manner is a key strength Many students have commented that the chapters they have read have encouraged them to read more in this field which is fantastic from a lecturer s perspective Richard White Sheffield Hallam University A new edition of the classic Approaches text for students organised in three sections which overviews and explains the history and philosophy of Human Geographies in all its applications by those who practise it Section One Philosophies Positivist Geography Humanism Feminist Geographies Marxisms Structuration Theory Human Animal Realism Postmodern Geographies Poststructuralist Theories Actor Network Theory Postcolonialism Geohumanities Technologies Section Two People Institutions and Cultures Places and Contexts Memories and Desires Understanding Place Personal and Political Becoming a Geographer Movement and Encounter Spaces and Flows Places as Thoughts Section Three Practices Mapping and Geovisualization Quantification Evidence and Positivism Geographic Information Systems Humanism Activism Feminist Geographies Poststructuralist Theories Psychoanalysis Environmental Inquiry Contested Geographies and Culture Wars Fully updated throughout and with eight brand new chapters this is the core text for modules on history theory and practice in Human Geography   **Durable Ideas in Software Engineering:**

Concepts, Methods and Approaches from My Virtual Toolbox James J. Cusick,2013-01-01 Software Engineering now occupies a central place in the development of technology and in the advancement of the economy from telecommunications to aerospace and from cash registers to medical imaging software plays a vital and often decisive role in the successful accomplishment of a variety of projects the creation of software requires a variety of techniques tools and especially properly skilled engineers This e book focuses on core concepts and approaches that have proven useful to the author time and time again on many industry projects over a quarter century of research development and teaching Enduring lasting and meaningful concepts ideas and methods in software engineering are presented and explained The book covers essential topics of the field of software engineering with a focus on practical and commonly used techniques along with advanced topics useful for extending the reader s knowledge regarding leading edge approaches Building on the industrial research and teaching experiences of the author a dynamic treatment of the subject is presented incorporating a wide body of published findings and techniques novel organization of material original concepts contributions from specialists and the clear concise writing required to keep the attention of readers Using over 20 years of lecture notes transcripts course notes view graphs published articles and other materials as well as industry experience on commercial software product development a virtual toolbox of software techniques are shared in this volume   Software Pioneers Manfred Broy,Ernst Denert,2012-12-06 A lucid statement of the philosophy of modular programming can be found in a 1970 textbook on the design of system programs by Gouthier and Pont 1 l Cfl0 23 which we quote below A well defined segmentation of the project effort ensures system modularity Each task fonos a separate distinct program module At implementation time each module and its inputs and outputs are well defined there is no confusion in the intended interface with other system modules At checkout time the in tegrity of the module is tested independently there are few sche duling problems in synchronizing the completion of several tasks before checkout can begin Finally the system is maintained in modular fashion system errors and deficiencies can be traced to specific system modules thus limiting the scope of detailed error searching Usually nothing is said about the criteria to be used in dividing the system into modules This paper will discuss that issue and by means of examples suggest some criteria which can be used in decomposing a system into modules A Brief Status Report The major advancement in the area of modular programming has been the development of coding techniques and assemblers which 1 allow one modu1e to be written with little knowledge of the code in another module and 2 alJow modules to be reas sembled and replaced without reassembly of the whole system   Computer Systems Science and Engineering ,1990

   Product-Focused Software Process Improvement Jürgen Münch,Matias Vierimaa,2006-09-21 This book constitutes the refereed proceedings of the 7th International Conference on Product Focused Software Process Improvement PROFES 2006 held in Amsterdam June 2006 The volume presents 26 revised full papers and 12 revised short papers together with 6 reports on workshops and tutorials The papers constitute a balanced mix of academic and industrial aspects organized in topical

sections on decision support embedded software and system development measurement process improvement and more

    <u>Advances in Enterprise Engineering VI</u> Antonia Albani,David Aveiro,Joseph Barjis,2012-05-02 This book constitutes the proceedings of the Second Enterprise Engineering Working Conference EEWC held in Delft The Netherlands during May 7 8 2012 EEWC aims at addressing the challenges that modern and complex enterprises are facing in a rapidly changing world The participants of the working conference share a belief that dealing with these challenges requires rigorous and scientific solutions focusing on the design and engineering of enterprises The goal of EEWC is to stimulate interaction between the different stakeholders scientists as well as practitioners interested in making enterprise engineering a reality The eight papers presented were carefully reviewed and selected for inclusion in the book EEWC 2012 had 20 submissions and accepted eight for publication The topics of the presented papers allowed for active participation in interesting discussions and exchange of ideas and stimulated future cooperation among the participants This made EEWC a real working conference contributing to the further development of enterprise engineering as a mature discipline Topics covered include foundations of enterprise engineering enterprise control flexibility and governance and specifying value **Software Quality** Daniel Galin,2018-03-27 The book presents a comprehensive discussion on software quality issues and software quality assurance SQA principles and practices and lays special emphasis on implementing and managing SQA Primarily designed to serve three audiences universities and college students vocational training participants and software engineers and software development managers the book may be applicable to all personnel engaged in a software projects Features A broad view of SQA The book delves into SQA issues going beyond the classic boundaries of custom made software development to also cover in house software development subcontractors and readymade software An up to date wide range coverage of SQA and SQA related topics Providing comprehensive coverage on multifarious SQA subjects including topics hardly explored till in SQA texts A systematic presentation of the SQA function and its tasks establishing the SQA processes planning coordinating follow up review and evaluation of SQA processes Focus on SQA implementation issues Specialized chapter sections examples implementation tips and topics for discussion Pedagogical support Each chapter includes a real life mini case study examples a summary selected bibliography review questions and topics for discussion The book is also supported by an Instructor s Guide   <u>The Responsible Software Engineer</u> Colin Myers,Tracy Hall,Dave Pitt,2012-12-06 You might expect that a person invited to contribute a foreword to a book on the 1 subject of professionalism would himself be a professional of exemplary standing I am gladdened by that thought but also disquieted The disquieting part of it is that if I am a professional I must be a professional something but what As someone who has tried his best for the last thirty years to avoid doing anything twice I lack one of the most important characteristics of a professional the dedicated and persistent pursuit of a single direction For the purposes of this foreword it would be handy if I could think of myself as a professional abstractor That would allow me to offer up a few useful abstractions about professionalism patterns that might illuminate the essays

that follow I shall try to do this by proposing three successively more complex models of professionalism ending up with one that is discomfortingly soft but still the best approximation I can make of what the word means to me The first of these models I shall designate Model Zero I intend a pejorative sense to this name since the attitude represented by Model Zero is retrograde and offensive but nonetheless common In this model the word professionalism is a simple surrogate for compliant uniformity   *Software Reading Techniques* Yang-Ming Zhu,2016-11-17 Learn twenty software reading techniques to enhance your effectiveness in reviewing and inspecting software artifacts such as requirements specifications designs code files and usability Software review and inspection is the best practice in software development that detects and fixes problems early Software professionals are trained to write software but not read and analyze software written by peers As a result individual reading skills vary widely Because the effectiveness of software review and inspection is highly dependent on individual reading skills differential outcomes among software readers vary by a factor of ten Software Reading Techniques is designed to close that gap Dr Yang Ming Zhu s depth of experience as a software architect team leader and scientist make him singularly well equipped to bring you up to speed on all the techniques and tips for optimizing the effectiveness and efficiency of your software review and inspection skills What You ll Learn Improve software review inspection procedures and reading skills Study traditional and modern advanced reading techniques applicable to software artifacts Master specific reading techniques for software requirements specification software design and code Who This Book Is For Software professionals and software engineering students and researchers   *Computer Systems and Software Engineering: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2017-12-01 Professionals in the interdisciplinary field of computer science focus on the design operation and maintenance of computational systems and software Methodologies and tools of engineering are utilized alongside computer applications to develop efficient and precise information databases Computer Systems and Software Engineering Concepts Methodologies Tools and Applications is a comprehensive reference source for the latest scholarly material on trends techniques and uses of various technology applications and examines the benefits and challenges of these computational developments Highlighting a range of pertinent topics such as utility computing computer security and information systems applications this multi volume book is ideally designed for academicians researchers students web designers software developers and practitioners interested in computer systems and software engineering   **Empirical Methods and Studies in Software Engineering** Reidar Conradi,Alf Inge Wang,2003-08-20 Nowadays societies crucially depend on high quality software for a large part of their functionalities and activities Therefore software professionals researchers managers and practitioners alike have to competently decide what software technologies and products to choose for which purpose For various reasons systematic empirical studies employing strictly scientific methods are hardly practiced in software engineering Thus there is an unquestioned need for developing improved and better qualified empirical methods for their application in practice and for

dissemination of the results This book describes different kinds of empirical studies and methods for performing such studies e g for planning performing analyzing and reporting such studies Actual studies are presented in detail in various chapters dealing with inspections testing object oriented techniques and component based software engineering   Research Anthology on Agile Software, Software Development, and Testing Management Association, Information Resources,2021-11-26 Software development continues to be an ever evolving field as organizations require new and innovative programs that can be implemented to make processes more efficient productive and cost effective Agile practices particularly have shown great benefits for improving the effectiveness of software development and its maintenance due to their ability to adapt to change It is integral to remain up to date with the most emerging tactics and techniques involved in the development of new and innovative software The Research Anthology on Agile Software Software Development and Testing is a comprehensive resource on the emerging trends of software development and testing This text discusses the newest developments in agile software and its usage spanning multiple industries Featuring a collection of insights from diverse authors this research anthology offers international perspectives on agile software Covering topics such as global software engineering knowledge management and product development this comprehensive resource is valuable to software developers software engineers computer engineers IT directors students managers faculty researchers and academicians

The Openxp Solution Dr. Sandra Walsh,2016-03-31 Over recent decades an abundance of reports have established that significant difficulties are experienced with the development of requirements in software projects Traditionally requirements are documented prior to development remaining fixed with little scope for subsequent change However for competitive domains change to initial expectations frequently occurs and should be accommodated to increase the likelihood of project success Agile Methods AMs recognise this creating shorter development cycles and increased customer involvement thus contributing toward higher levels of adaptability for changing requirements However despite widespread adoption problems still remain as considerable difficulty exists in managing negotiation between interdisciplinary stakeholder groups Specific problems include difficulty achieving a collaborative approach early detection and resolution of requirements conflict and limited access to suitable stakeholders also contributes toward developers not fully understanding the domain In response to these challenges this book has been written to address the inclusion of input from critical stakeholders on software development projects This is achieved by utilizing Home Care Systems HCS as an exemplar for Dynamically Adaptive Systems DAS illustrating how AMs can be extended to better suit the desirable characteristics for an evolutionary Requirements Engineering RE approach to be developed The findings from multiple studies both academic and industry based inform the development of a novel evolutionary framework called OpenXP to improve the facilitation of agile requirements elicitation in complex business domains OpenXP provides the Agile Business Analyst with a practical solution to the strategic consolidation of multiple diverse viewpoints in developing a representative perspective of the overall project

goal Specifically this novel approach introduces a more participatory elicitation process extending hands on support for prioritization decision making and the provision of an informative workspace including upper level business context needed for developing user stories The OpenXP framework is a three phased solution consisting of nine specific steps linked with four broader facets Each facet is then responsible for implementing one or more strategic functions that comprise Stakeholder Coordination Business and IT Alignment Effective Communication Adaptability Integration on agile software projects   **Software Measurement** Reiner Dumke,Alain Abran,2013-11-11 Software developers are faced with the challenge of making software systems and products of ever greater quality and safety while at the same time being faced with the growing pressure of costs reduction in order to gain and maintain competitive advantages As in any scientific and engineering discipline reliable measurement is essential for talking on such a challenge Software measurement is an excellent abstraction mechanism for learning what works and what doesn t Victor Basili Measurement of both software process and products provides a large amount of basic information for the evaluation of the software development processes or the software products themselves Examples of recent successes in software measurement span multiple areas such as evaluation of new development methods and paradigms quality and management improvement programs tool supporting initiatives and company wide measurement programs The German Computer Science Interest GI Group of Software Metrics and the Canadian Interest Group in Software Metrics CIM have attended to these concerns in the recent years Research initiatives were directed initially to the definition of software metrics and then to validation of the software metrics themselves This was followed by more and more investigation into practical applications of software metrics and by critical analysis of the benefits and weaknesses of software measurement programs Key findings in this area of software engineering have been published in some important books such as Dumke and Zuse s Theory and Practice of Software Measurement Ebert and Dumke s Software Metrics in Practice and Lehner Dumke and Abran s Software Metrics

Reviewing **Software Engineering Concepts Professional Software Vol 1**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is truly astonishing. Within the pages of "**Software Engineering Concepts Professional Software Vol 1**," an enthralling opus penned by a very acclaimed wordsmith, readers embark on an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve into the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.

Software Engineering Concepts Professional Software Vol 1 Introduction

Software Engineering Concepts Professional Software Vol 1 Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Software Engineering Concepts Professional Software Vol 1 Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Software Engineering Concepts Professional Software Vol 1 : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Software Engineering Concepts Professional Software Vol 1 : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Software Engineering Concepts Professional Software Vol 1 Offers a diverse range of free eBooks across various genres. Software Engineering Concepts Professional Software Vol 1 Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Software Engineering Concepts Professional Software Vol 1 Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Software Engineering Concepts Professional Software Vol 1, especially related to Software Engineering Concepts Professional Software Vol 1, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Software Engineering Concepts Professional Software Vol 1, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Software Engineering Concepts Professional Software Vol 1 books or magazines might include. Look for these in online stores or libraries. Remember that while Software Engineering Concepts Professional Software Vol 1, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Software Engineering Concepts Professional Software Vol 1 eBooks for free, including popular titles.Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain

books.Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Software Engineering Concepts Professional Software Vol 1 full book , it can give you a taste of the authors writing style.Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Software Engineering Concepts Professional Software Vol 1 eBooks, including some popular titles.

FAQs About Software Engineering Concepts Professional Software Vol 1 Books

1. Where can I buy Software Engineering Concepts Professional Software Vol 1 books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Software Engineering Concepts Professional Software Vol 1 book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Software Engineering Concepts Professional Software Vol 1 books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Software Engineering Concepts Professional Software Vol 1 audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media

or recommend them to friends.

9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Software Engineering Concepts Professional Software Vol 1 books for free? Public Domain Books: Many classic books are available for free as theyre in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
