Ade Freeman,Scott M. Swinton,2005 In response to increasing concerns about the degradation of natural resources and the sustainability of agriculture many research programmes have been established in natural resource management NRM However although methods for evaluating the impacts of crop improvement technologies are well developed there is a dearth of methods for evaluating the impacts of NRM interventions This is partly due to the complexity of interactions among natural resources spatial and temporal dimensions of impact and the valuation of direct and indirect environmental costs and benefits This book discusses the unique features and methodological difficulties of NRM impact assessment It examines the strengths and weaknesses of various impact assessment approaches including econometric bio economic and more direct methods It also assesses and identifies data requirements for developing impact indicators and recommends suitable methodologies for assessing the impacts of NRM technologies on issues such as soil and water conservation and watershed and biodiversity management Methods for Assessment of Soil Degradation Rattan Lal,Winfried E. H. Blum,C. Valentin,B.A. Stewart,2020-11-26 Soil degradation has serious global impacts on agronomic economic and sociopolitical conditions however statistics regarding the degree of these impacts has been largely unreliable This book aims to standardize the methodology for obtaining reliable and objective data on soil degradation It will also identify and develop criteria for assessing the severity of soil degradation providing a realistic scenario of the problem
