Solar-Type Activity in Main-Sequence Stars Roald E. Gershberg, 2005-11-13 The first comprehensive monograph on this active and productive field of research investigates solar type activity amongst the large spectrum of low and middle mass main sequence stars and presents the subject in a systematic and comprehensive fashion      Formation and Evolution of Low Mass Stars A.K. Dupree, Maria Teresa Vaz Torrão Lago, 2012-12-06 This book represents the Proceedings of the NATO Advanced Study Institute on Formation and Evolution of Low Mass Stars held from 21 September to 2 October 1987 at Viana do Castelo Portugal Holding the meeting in Portugal recognized both the historical aspects and the bright future of astronomy in Portugal In the early sixteenth century the Portuguese played an important role in the critical diffusion of classical and medieval knowledge which formed so large a part of scientific activity at that time Navigation and course setting brought to a high level by Portuguese explorers relied on mathematics and astronomy to produce precise tables of solar positions In contemporary Portugal astronomy is the focus of renewed interest and support at the universities It is thus particularly appropriate that the NATO Advanced Study Institute was held on the coast of the Atlantic Ocean in the friendly surroundings of the Costa Verde

Rodono, 2013-11-11 IAU Colloquium No 71 had its immediate origins in a small gathering of people interested in the optical and UV study of flare stars which took place during the 1979 Montreal General Assembly We recognized that a fundamental change was taking place in the study of these objects Space borne instruments especially IUE and Einstein and a new generation of ground based equipment were having a profound effect on the range of investigations it was possible to make To extract maximum benefit from these new possibilities it would be necessary as never before to have good communication with colleagues in other disciplines for instance with atomic and solar physicists Similarly studies of phenomena associated with the outer atmospheres of the late type stars could now hope to give significant insights into certain aspects of solar activity So in view of the wide range of backgrounds of those participating the meeting had an unusually high proportion of invited reviews while most of the contributed papers were presented as posters It is gratifying that in the short time since the meeting a good deal of correspondence has been received from participants remarking on the success of this format Once the decision had been taken in principle to hold the meeting a very considerable amount of work fell on the two organizing committees viz
