Soldiers And Innocents:

Soldiers and Innocents Russell Celyn Jones,1991 **The Crisis** ,2005-09 The Crisis founded by W E B Du Bois as the official publication of the NAACP is a journal of civil rights history politics and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color For nearly 100 years The Crisis has been the magazine of opinion and thought leaders decision makers peacemakers and justice seekers It has chronicled informed educated entertained and in many instances set the economic political and social agenda for our nation and its multi ethnic citizens *Debating Terrorism and Counterterrorism* Stuart Gottlieb,2013-04-02 Debate is an important part of the classroom experience However most debate style readers do a disservice to students by selecting readings from disparate sources that end up talking past one another As a part of the Debating Politics series from CQ Press this reader is different Featuring paired pro con pieces written specifically for this volume Debating Terrorism encourages students to actively grapple with the central debates and questions surrounding the subject of terrorism and counterterrorism With topics ranging from the root causes of terrorism the role of religion in terrorism whether suicide terrorism is ever justified whether the spread of democracy can help defeat terrorism and what trade offs if any should exist between security and civil liberties Gottlieb s outstanding cast of contributors returns in this edition compelling students to wrestle with the conflicting perspectives that define the field Gottlieb frames the complexity and sophistication of these issues with incisive chapter headnotes providing students with the requisite context and preparing them to read each argument critically allowing them to understand the past present and future of terrorism and counterterrorism Each of the selections has been thoroughly updated to account for recent world events policy changes and new scholarship New to the reader and by reviewer request is a chapter Can Global Institutions Make a Difference in Fighting Terrorism **War Is Never Just** David Swanson,2018-04-03 Swanson builds a case that the time has come to set behind us the idea that a war can ever be just This critique of Just War theory finds the criteria such theories use to be either unmeasurable unachievable or amoral and the perspective taken too narrow This book argues that belief in the possibility of a just war does tremendous damage by facilitating enormous investment in war preparations which strips resources from human and environmental needs while creating momentum for numerous unjust wars **Teachers Manual of Primary Methods** Thomas Edward Shields,1912

The Child and the World Jana Tabak,2020 However unthinkable child soldiers may be within a generalized conception of childhood they are not imaginary figures rather they are a constant in almost every armed conflict around the world The participation of children in wars may question the idea of childhood as a once upon a time story with a happy and predictable ending disrupting the natural idea of a protected and innocent childhood and also eliciting fear uncertainty revulsion horror and sorrow Using the perspectives of both childhood studies and critical approaches to international relations Jana Tabak explores the constructions of child soldiers as children at risk and at the same time risky children More specifically The Child

and the World aims both to problematize the boundaries that articulate child soldiers as necessarily deviant and pathological in relation to normal children and to show how these specific limits participate in the re production and promotion of a particular version of the international political order In this sense the focus of this work is not on investigating child soldiers lives and experiences per se but on their presumed threatening feature as they depart from the protected territory of childhood disquieting everyday international life

Norman Kings of Sicily and the Rise of the

Anti-Islamic Critique Joshua C. Birk,2017-01-11 This book is an investigative study of Christian and Islamic relations in the kingdom of Sicily during the eleventh and twelfth centuries It has three objectives First it establishes how and why the Norman rulers of Sicily all of whom were Christians incorporated Muslim soldiers farmers scholars and bureaucrats into the formation of their own royal identities and came to depend on their Muslim subjects to project and enforce their political power Second it examines how the Islamic influence within the Sicilian court drew little scrutiny and even less criticism from intellectuals in the wider world of Latin Christendom during the time period Finally it contextualizes and explains the eventual emergence of Christian popular violence against Muslims in Sicily in the latter half of the twelfth century and the evolution of a wider discourse of anti Islamic sentiment throughout Western Europe **Unity** ,1927 **The Independent** ,1906

Star Wars and the History of Transmedia Storytelling Sean Guynes,Dan Hassler-Forest,2025-10-01 Star Wars has reached more than three generations of casual and hardcore fans alike and as a result many of the producers of franchised Star Wars texts films television comics novels games and more over the past four decades have been fans turned creators Yet despite its dominant cultural and industrial positions Star Wars has rarely been the topic of sustained critical work Star Wars and the History of Transmedia Storytelling offers a corrective to this oversight by curating essays from a wide range of interdisciplinary scholars in order to bring Star Wars and its transmedia narratives more fully into the fold of media and cultural studies The collection places Star Wars at the center of those studies projects by examining video games novels and novelizations comics advertising practices television shows franchising models aesthetic and economic decisions fandom and cultural responses and other aspects of Star Wars and its world building in their multiple contexts of production distribution

and reception In emphasizing that Star Wars is both a media franchise and a transmedia storyworld Star Wars and the History of Transmedia Storytelling demonstrates the ways in which transmedia storytelling and the industrial logic of media franchising have developed in concert over the past four decades as multinational corporations have become the central means for subsidizing profiting from and selling modes of immersive storyworlds to global audiences By taking this dual approach the book focuses on the interconnected nature of corporate production fan consumption and transmedia world building As such this collection grapples with the historical cultural aesthetic and political economic implications of the relationship between media franchising and transmedia storytelling as they are seen at work in the world s most profitable transmedia franchise

History of the Irish People William Anderson O'Conor,1886 [Catholic Realism Abolition of War](#) David Carroll Cochran,2014-01-09 Argues that the abolition of war like that of slavery and other forms of social violence is possible using the principles and history of the Just War tradition in Catholic theology and philosophy [The Laws of War in International Thought](#) Pablo Kalmanovitz,2020-09-15 The Law of Armed Conflict is usually understood to be a regime of exception that applies only during armed conflict and regulates hostilities among enemies It assigns privileges to states far beyond what they are allowed to do in peacetime and it mandates certain protections for non combatants which can often be defeated by appeals to military necessity or advantage The Laws of War in International Thought examines the intellectual history of the laws of war before their codification It reconstructs the processes by which political and legal theorists built the laws distinctive vocabularies and legitimized some of their broadest permissions and it situates these processes within the broader intellectual project that from early modernity spelled out the nature function and powers of state sovereignty The book focuses on four historical moments in the intellectual history of the laws of war the doctrine of just war in Spanish scholasticism Hugo Grotius s theory of solemn war the Enlightenment theory of regular war and late nineteenth century humanitarianism By looking at these moments Pablo Kalmanovitz shows how challenging and polemical it has been for international theorists to justify the exceptional and permissive character of the laws of war In this way he contributes to recover a sense of the historical foundations and many still problematic aspects of the Law of Armed Conflict
