**Status and Sacredness** Murray Milner, 1994 **Status and Sacredness** provides a new theory of status and sacral relationships and a provocative reinterpretation of the Indian caste system and Hinduism Milner shows how in India and many other social contexts status is a key resource and that sacredness can be usefully understood as a special form of status By analyzing the nature of this resource Milner is able to provide powerful explanations of the key features of the social structure culture and religion He argues against the widely held view that the Indian caste system is best understood as a unique cultural development demonstrating that many of the seemingly exotic features are variations on themes common to other societies Milner's analysis is rooted in a new theoretical framework called resource structuralism that helps to clarify the nature and significance of power and symbolic capital The book thus provides a bold new analysis of India an innovative

approach to the analysis of religion and an important contribution to social theory      **Factionalism in Social Movements**

Nadia Aboushady,2023-06-30 This research unpacks the reasons of the Muslim Brotherhood s factionalism post 2013 and defines the scope of disagreements within the group by applying an interactionist approach to factionalism This approach analyzes the interplay between the macro meso and micro dimensions The research re constructs the narrative of Muslim Brotherhood s factionalism post 2013 and includes the implicit micro structural dimensions of the factional process thereby proposing a more comprehensive narrative to the conflict      **A History of Sociology in Britain** A. H. Halsey,2004-03-18

This is the first ever critical history of sociology in Britain written by one of the world s leading scholars in the field Renowned British sociologist A H Halsey presents a vivid and authoritative picture of the neglect expansion fragmentation and explosion of the discipline during the past century He is well equipped to write the story having lived through most of it and having taught and researched in Britain the USA and Europe The story begins with L T Hobhouse s election to the first chair in sociology in London in 1907 but traces earlier origins of the discipline to Scotland and the English provinces There is a lively account of the nineteenth century battles between literature and science for the possession of the third culture of social studies setting the context for a narrative history of rapid expansion in the second half of the twentieth century LSE had a virtual monopoly before World War II The educational establishment of Oxford and Cambridge opposed its introduction into the undergraduate curriculum Only the expansion of sociology to the Scottish Welsh provincial and new universities after the Robbins Report of 1963 brought reluctant acceptance of the subject to Oxford and Cambridge The student troubles of 1968 are then described and the subsequent doubts confrontations and cuts of the 1970s and 80s Then paradoxically by a Conservative Government there was a new university expansion incorporating polytechnics and other colleges with a consequent doubling of both staff and students in the 1990s Yet the end of the century left sociology riven by intellectual conflict It had survived the Marxist subversions of the 70s and the feminist invasion Yet the renewed challenges of various forms of relativism especially ethno methodology and post modernism still threatened and at root the war was as it began between a scientific quantifying and explanatory subject and a literary interpretative set of cultural studies      **No**

**Discouragement** A.H. Halsey,foreword Roy Hattersley,1996-11-13 This is the autobiography of a working class boy who became an Oxford professor A H Halsey was born in Kentish Town London in 1923 a railway child in a large clan The family moved in 1926 to Rutland and then to Northamptonshire because the father had been wounded in the Great War Halsey won the scholarship to Kettering Grammar School in 1933 left school at 16 went into the RAF as a pilot cadet The metaphor of travel through time and space is maintained throughout this autobiography The story begins with daily walks past canal boats in Oxford flashes to the Pacific to Hong Kong and China and then to a glimpse of death in the John Radcliffe Hospital promising to explain the whole journey from a council housing estate to a professorial chair at Oxford      The Persistence of the Particular Dennis Wrong,2017-07-12 Definitions of human beings as symbolic animals emphasize our capacity to form

theories and general laws that can be applied to common social experience This is balanced by an equally strong will to define events and conditions that are particular to specific times places and individuals In this volume Dennis H Wrong argues that the scientific standard of universal laws and propositions has only limited relevance to human historical phenomena Wrong identifies the essential questions for social science as the place of nature and nurture in forming personality the sources of variation in human conduct and culture the causes of deviations from social norms how human motivations are socially shaped and controlled to make society possible and finally the causes of social change Because successive generations of thinkers have given varying answers to these questions no cumulative progress can be said to have occurred Wrong argues that the unity of theory and research sought by American sociologists cannot be obtained in social theory In terms of sociological practice this has created a disparity between the canonical theories of Marx Durkheim and Weber and the empirically oriented methodologies of current social research especially questionnaires fieldwork and statistical research Wrong attributes this disparity to postmodern skepticism about the potential of the social sciences to create a body of knowledge that might positively reshape human society Between the large scale theoretical constructs of classical theory and the overly particularistic tendencies associated with postmodernism Wrong argues for a historically oriented approach emphasizing unforeseen accidental agents as a foundation for modestly conceived theories Wrong emphasizes that the capacity to avoid predictable standardized responses whether they are based on instinct or ingrained habit is the source of human creativity Homo sapiens is as m

**Problem of Order** Dennis Wrong, 1994-01-31 At the end of the twentieth century many fear that the bonds holding civil society together have come undone Yet as the noted scholar Dennis Wrong shows us our generation is not alone in fearing a breakdown of social ties and a descent into violent conflict

**The Making of an African Working Class** Pnina Werbner, 2014-07-20 It is now 50 years since E P Thompson published his classic *The Making of the English Working Class* *The Making of an African Working Class* follows Thompson in exploring the formation of working class identity among low paid African workers In arguing for a radical public anthropology of worker identity the book seeks to analyse the cultural legal ideological and experiential dimensions of labour activism often neglected in other labour studies Pnina Werbner shows that by fusing cosmopolitan and local popular cultural forms of protest unionists have created a distinctive vernacular way of being a worker in Botswana one that does not deny workers roots at home or in the countryside while being cognisant of a wider world of cosmopolitan labour rights The assertion of working class dignity honour and respect Pnina argues is a powerful motivating force for manual workers Against legal sceptical approaches *The Making of an African Working Class* argues that in challenging the government their employer in court manual workers protests and mobilisation are deeply embedded in ethics social justice and the law

**The Making of a Sociologist** John H. Goldthorpe, 2025-04-14 This book offers a journey through the problems and the progress of the discipline of sociology in the UK and Europe throughout the second half of the twentieth century via an exploration of seven

social settings from the life of a now eminent sociologist It conceptualises the complex relation that exists between being and knowing and between the personal knowledge that comes from lived experience and the essentially impersonal knowledge that any science seeks to pursue The seven very contrasting settings are described in detail together with reference to some of their leading personalities such as David Glass Karl Popper Norbert Elias Sebastian Sprott Richard Hoggart Noel Annan E M Forster G sta Rehn Chelly Halsey Fred Hirsch and J rgen Habermas In each case the author shows how his lived experience within these settings formed a substratum of his sociology and how he navigated the line between personal knowledge as a creative resource and personal knowledge as potential bias using methodological discipline It will ultimately appeal to those with interests in sociology philosophy of science sociological histories and biographical methods

**The European Heritage** Gerard Delanty, 2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference points

Structure, Agency and Biotechnology Aristeidis Panagiotou, 2017-07-03 Structure Agency and Biotechnology argues for the significance of sociological theory and highlights the insights it can offer to the study of agricultural biotechnology Cautioning against a simplistic reading of the GM controversy as merely a debate of science versus politics Aristeidis Panagiotou suggests that the discussion should be embedded in the wider social political economic and cultural contexts Structure Agency and Biotechnology assesses the 2012 Rothamsted GM wheat trials and proposes that the tension underlying GM technology should be resolved through sustained dialogue public involvement and broad scientific consensus

**A Dictionary of Sociology** John Scott, 2014-09-11 A consistent best seller the wide ranging and authoritative Dictionary of Sociology was first published in 1994 and contains more than 2 500 entries on the terminology methods concepts and thinkers in the field as well as from the related fields of psychology economics anthropology philosophy and political science For this fourth edition Professor John Scott has conducted a thorough review of all entries to ensure that they are concise focused and up to date

*Workplace Justice* Sharon Kurtz, 2002 In 1991 Columbia University's one thousand clerical workers launched a successful campaign for justice in their workplace This diverse union two thirds black and Latina three fourths women was committed to creating an inclusive movement organization and to fighting for all kinds of justice How could they address the many race and gender injustices members faced avoid schism and maintain the unity needed to win Sharon Kurtz an experienced union activist and former clerical worker herself was welcomed into the union and pursued these questions Using this case study and secondary studies of sister clerical unions at Yale and Harvard she examines the challenges and potential of identity politics in labor movements With the Columbia strike as a point of departure Kurtz argues that identity politics are valuable for mobilizing groups but often exclude members and their experiences of oppression However Kurtz believes that identity politics should not be abandoned as a component in building movements but should be reframed as multi identity politics In the end she shows an approach to organizing with great potential impact not only for labor unions but for any social movement
