Forgotten Men and Fallen Women Holly Allen, 2015-04-03 During the Great Depression and into the war years the Roosevelt administration sought to transform the political institutional and social contours of the United States One result of the New Deal was the emergence and deployment of a novel set of narratives reflected in social scientific case studies government documents and popular media meant to reorient relationships among gender race sexuality and national political power In *Forgotten Men and Fallen Women* Holly Allen focuses on the interplay of popular and official narratives of forgotten manhood fallen womanhood and other social and moral archetypes In doing so she explores how federal officials used stories of collective civic identity to enlist popular support for the expansive New Deal state and later for the war effort These stories she argues had practical consequences for federal relief politics The forgotten man identified by Roosevelt in a fireside chat in 1932 for instance was a compelling figure of collective civic identity and the counterpart to the white male breadwinner who was the prime beneficiary of New Deal relief programs He was also associated with women who were

blamed either for not supporting their husbands and family at all owing to laziness shrewishness or infidelity or for supporting them too well by taking their husbands jobs rather than staying at home and allowing the men to work During World War II Allen finds federal policies and programs continued to be shaped by specific gendered stories most centrally the story of the heroic white civilian defender which animated the Office of Civilian Defense and the story of the sacrificial Nisei Japanese American soldier which was used by the War Relocation Authority The Roosevelt administration's engagement with such widely circulating narratives Allen concludes highlights the affective dimensions of U S citizenship and state formation
