Speaking And Semiology Maurice Merleau-Ponty's Phenomenological Theory Of Existential Communication:

Speaking and Semiology, 1991 No detailed description available for Speaking and Semiology *Speaking and Semiology* Richard L. Lanigan, 2013-02-06 No detailed description available for Speaking and Semiology **Speaking and Semiology; Maurice Merleau-Ponty's Phenomenological Theory of Existential Communication, by Richard L. Lanigan** Richard L. Lanigan, 1972 **Speaking and Semiology; Maurice Merleau-Ponty's Phenomenological Theory of Existential Communication** Richard L. Lanigan, 1972 *Dialogic Ethics* Ronald C. Arnett, François Cooren, 2018-06-14 Dialogic Ethics offers an impressionistic picture of the diversity of perspectives on this topic Daily we witness local regional national and international disputes each propelled by contention over what is and should be the good propelling communicative direction and action Communication ethics understood as an answer to problems often creates them If we understand communication ethics as a good protected and promoted by a given set of communicators we can understand how acts of colonialism and totalitarianism could move forward legitimized by the assumption that I am right This volume eschews such a presupposition recognizing that we live in a time of narrative and virtue contention We dwell in an era where the one answer is more often dangerous than correct **Routledge History of Philosophy Volume VIII** Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchwork of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990 s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau-Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti-foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological table of philosophical scientific and other cultural events *Recovering Pragmatism's Voice* Lenore Langsdorf, Andrew R. Smith, 1995-01-01 This book establishes a new paradigm for CAD expanding computer tools beyond the technical processes of computer aided design to include the discussion and negotiation which are a necessary complement to developing design ideas thus introducing the concept that design is fundamentally a social process **The Experience of Human Communication** Frank J. Macke, 2014-12-24 This book deals with matters of embodiment and meaning in other words the essential components of what Continental thought since Heidegger has come to

consider as communication A critical theme of this book concerns the basic tenet that consciousness of one's Self and one's body is only possible through human relationship This is of course the phenomenological concept of intersubjectivity But rather than let this concept remain an abstraction by discussing it as merely a function of language and signs this work attempts to explicate it empirically That is it discusses the manner in which from infancy to childhood and adolescence and the dawning of our sexual identities through physical maturity and old age we come to experience the ecstasy of what Merleau Ponty has so poetically termed flesh It is rarely clear what someone means when she or he uses the word communication An important objective of this book is thus to advance understanding of what communication is In academic discourse communication has come to be understood in a number of contexts some conflicting and overlapping as a process a strategy an event an ethic a mode or instance of information or even a technology In virtually all of these discussions the concept of communication is discussed as though the term's meaning is well known to the reader When communication is described as a process the meaning of the term is held at an operational level that is in the exchange of information between one person and another what must unambiguously be inferred is that communication is taking place In this context information exchange and communication become functionally synonymous But as a matter of embodied human psychological experience there is a world of difference between them As such this book attempts to fully consider the question of how we experience the event of human communication The author offers a pioneering study that advances the *raison d'être* of the emergent field of communicology while at the same time offering scholars of the human sciences a new way of thinking about embodiment and relational experience *Merleau-Ponty and Derrida* Jack Reynolds, 2004 While there have been many essays devoted to comparing the work of Maurice Merleau Ponty with that of Jacques Derrida there has been no sustained book length treatment of these two French philosophers Additionally many of the essays presuppose an oppositional relationship between them and between phenomenology and deconstruction more generally Jack Reynolds systematically explores their relationship by analyzing each philosopher in terms of two important and related issues embodiment and alterity Focusing on areas with which they are not commonly associated e g Derrida on the body and Merleau Ponty on alterity makes clear that their work cannot be adequately characterized in a strictly oppositional way Merleau Ponty and Derrida Intertwining Embodiment and Alterity proposes the possibility of a Merleau Ponty inspired philosophy that does not so avowedly seek to extricate itself from phenomenology but that also cannot easily be dismissed as simply another instantiation of the metaphysics of presence Reynolds argues that there are salient ethico political reasons for choosing an alternative that accords greater attention to our embodied situation As the first full length monograph comparing the philosophers Merleau Ponty and Derrida will interest scholars and students in European philosophy and teachers of courses dealing with deconstruction *Encyclopedia of Media and Communication* Marcel Danesi, 2013-06-17 The first comprehensive encyclopedia for the growing fields of media and communication studies the Encyclopedia of Media

and Communication is an essential resource for beginners and seasoned academics alike Contributions from over fifty experts and practitioners provide an accessible introduction to these disciplines most important concepts figures and schools of thought from Jean Baudrillard to Tim Berners Lee and podcasting to Peircean semiotics Detailed and up to date the Encyclopedia of Media and Communication synthesizes a wide array of works and perspectives on the making of meaning The appendix includes timelines covering the whole historical record for each medium from either antiquity or their inception to the present day Each entry also features a bibliography linking readers to relevant resources for further reading The most coherent treatment yet of these fields the Encyclopedia of Media and Communication promises to be the standard reference text for the next generation of media and communication students and scholars
