Agricultural Research and Development, Special Oversight Hearings, Part II United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1975 **Technology and Productivity** Youngil Lim, 1999 Explores the process by which the poverty stricken agrarian economy of South Korea was transformed during the 1970s to the 1990s into a semi industrial urban economy The text discusses neoclassical views of South Korean experience and speculates on South Korea's technological future *Acquiring, Adapting and Developing Technologies* Kwan S. Kim, Fumio Maki, Ryoshin Minami, Joung-hae Seo, 1995-02-12 Economic progress requires technological development which in turn depends on a country's social capacity to acquire assimilate and develop new technologies Focusing on the evolution of Japan's economy from the Meiji Restoration to the present day this volume provides an authoritative account firmly grounded in theoretical and empirical analysis of the country's attempts to generate the necessary social capacity for technological innovation and absorption Successive chapters address the specific experiences of a number of key Japanese industries during this process Each industrial case study is written by an acknowledged expert in the field and presents material of significant interest to specialists in economic development in a form that is also accessible to the nonspecialist The book concludes with a summary of useful lessons variously applicable to countries at all the different stages of industrialization **The Relations between Defence and Civil Technologies** Philip Gummett, Judith Reppy, 2013-03-09 This book arises from a meeting held at Wiston House Sussex UK in September 1987 The meeting brought together academic governmental and industrial experts from eight countries to discuss the increasingly important subject of the relations between civil and defence technologies It was primarily funded under the Advanced Research Workshops Programme of NATO's Scientific Affairs Division and was the first science policy workshop funded by the Programme Additional financial support came from the Leverhulme Trust The choice of topic of speakers and finally of papers to be published was entirely ours The conclusions reached were our own and those of the participants They were not in any way guided by NATO nor do they represent NATO policy We speak for all the participants in offering our thanks to the NATO Scientific Affairs Division especially Secretary General Durand and Dr Craig Sinclair for their generosity and encouragement Without them this book would not exist We thank the Leverhulme Trust for enabling assistance to be provided to the Workshop Directors in the form of Iain Bate who himself played a major part in the success of the meeting The staff of Wiston House must also be thanked for providing an admirable environment for the meeting For secretarial support prior to the meeting we thank Gill Miller and Lesley Price Finally we offer special thanks to Mrs Yvonne Aspinall for converting all the papers in whatever state they were presented into camera ready copy with such professionalism and good humour Controlling Technology , Productivity Gain Sharing Plus Paul Carey, 2023-06-14 This book is for consultants internal and external plus senior executives interested in designing and implementing gain sharing plans that work Well

designed gain sharing developed through participative means is a glue that binds and integrates teams into a single cohesive whole This book lays out the challenges of using the framework of gain sharing and its mechanisms for unleashing the productive and creative power of a big team in an organisation the organisation can still be a small one where the big team is the sum of all parts of the organisation or even the organisation extended to its suppliers and customers It s often difficult to bring all the teams departments and units together to work as a cohesive whole How to go about tackling this challenge And how to enhance the original philosophy of gain sharing This methodology can make an accomplished addition to your kit of tools

Kaple,1994-01-06 Drawing on previously unknown primary sources in both Chinese and Russian Deborah A Kaple has written a powerful and absorbing account of the model of factory management and organization that the Chinese communists formulated in the 1949 1953 period She reveals that their new management techniques were adapted from Soviet propaganda during the harsh period of Stalin s post war reconstruction The idealized Stalinist management system consisted mainly of strict Communist Party control of all aspects of workers lives which is the root of such strong Party control over Chinese society today *Dream of a Red Factory* is a rare and revealing look at the consolidation rule in China told through the prism of the development of new socialist factories and enterprises Kaple completely counters the old myth of the Soviet monolith in China and carefully reconstructs how the Chinese communists came to rely on an idealized propagandistic version of the Soviet model instead
