Manufacturing National Park Nature J. Keri Cronin, 2011-07-01 National parks occupy a prominent place in the Canadian imagination yet we are only beginning to understand how their visual representation has shaped and continues to inform our perceptions of ecological issues and the natural world J Keri Cronin draws on historical and modern postcards advertisements and other images of Jasper National Park to trace how various groups and the tourism industry have used photography to divorce the park from real environmental threats and instead package it as a series of breathtaking vistas and adorable looking animals Manufacturing National Park Nature demonstrates that popular forms of picturing nature can have ecological implications that extend far beyond the frame of the image

Nature's New Deal Neil M. Maher, 2008 Neil M Maher examines the history of one of Franklin D Roosevelt's boldest and most successful experiments the Civilian Conservation Corps describing it as a turning point both in national politics and in the emergence of modern environmentalism

Reel Nature Gregg Mitman, 1999 Americans have had a long standing love affair with the wilderness As cities grew and frontiers disappeared film emerged to feed an insatiable curiosity about wildlife The camera promised to bring us into contact with the animal world undetected and unarmed Yet the camera's penetration of this world has inevitably brought human artifice and technology into the picture as well In the first major analysis of American nature films in the twentieth century Gregg Mitman shows how our cultural values scientific needs and new technologies produced the images that have shaped our contemporary view of wildlife Like the museum and the zoo the nature film sought to recreate the experience of unspoiled nature while appealing to a popular audience through a blend of scientific research and commercial promotion education and entertainment authenticity and artifice Travelogue expedition films like Teddy Roosevelt's African safari catered to upper and middle class patrons who were intrigued by the exotic and entertained by the thrill of big game hunting and collecting The proliferation of nature movies and television shows in the 1950s such as Disney's True Life Adventures and Marlin Perkins's Wild Kingdom made nature familiar and accessible to America's baby boom generation fostering the environmental activism of the latter part of the twentieth century Reel Nature reveals the shifting conventions of nature films and their enormous impact on our perceptions of and politics about the environment Whether crafted to elicit thrills or to educate audiences about the real life drama of threatened wildlife nature films then and now reveal much about the yearnings of Americans to be both close to nature and yet distinctly apart

Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it

central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences

Entertaining Elephants Susan Nance, 2013-03-27 How the lives and labors of nineteenth century circus elephants shaped the entertainment industry Consider the career of an enduring if controversial icon of American entertainment the genial circus elephant In *Entertaining Elephants* Susan Nance examines elephant behavior drawing on the scientific literature of animal cognition learning and communications to offer a study of elephants as actors rather than objects in American circus entertainment between 1800 and 1940 By developing a deeper understanding of animal behavior Nance asserts we can more fully explain the common history of all species *Entertaining Elephants* is the first account that uses research on animal welfare health and cognition to interpret the historical record examining how both circus people and elephants struggled behind the scenes to meet the profit necessities of the entertainment business The book does not claim that elephants understood endorsed or resisted the world of show business as a human cultural or business practice but it does speak of elephants rejecting the conditions of their experience They lived in a kind of parallel reality in the circus one that was defined by their interactions with people other elephants horses bull hooks hay and the weather Nance's study informs and complicates contemporary debates over human interactions with animals in entertainment and beyond questioning the idea of human control over animals and people's claims to speak for them As sentient beings these elephants exercised agency but they had no way of understanding the human cultures that created their captivity and they obviously had no claim on human social and political power They often lived lives of apparent desperation

Wild Things Sidney I. Dobrin, Kenneth B. Kidd, 2004 Today's children are occupied with activities taking place in settings that are isolated from nature or are simulations of the earth's natural environment This text examines the ways in which literature media and other cultural forms for young people address nature place and ecology
