The Optics Of Rays Wavefronts And Caustics Pure And Applied Physics Volume 38:

The Optics of Rays, Wavefronts, and Caustics O Stavroudis, 2012-12-02 The Optics of Rays Wavefronts and Caustics presents the fundamental principles of geometrical optics and its unique role in modern technology It also discusses the procedures used in optical design which are based on geometrical optics Organized into 16 chapters this volume begins with an overview of the underlying general mathematical facts which constitute the substance of geometrical optics It then presents the various techniques used to solve the ray and wavefront problems in general inhomogeneous medium Other chapters consider the concept of ray tracing as a tool for calculating the principal curvatures of a wavefront as it propagates through a lens In addition the book tackles several topics including the aspects of lens design as well as a system of equations that are similar to the Maxwell equations The last chapter deals with orthotomic systems of rays Optical designers optical physicists theoretical physicists and mathematicians will find the information and methods in this book extremely useful

Visual Thought Liliana Albertazzi, 2006-12-20 This volume starts from an interdisciplinary expertise of the contributors and chooses to work on the very origins of conscious qualitative states in perception The leading research paradigm can be synthesized in phenomenology to neurons to stimuli and backwards since as a starting point it has taken the phenomenal appearances in the visual field Specifically the leading theme of the volume is the co presence and interaction of diverse types of spaces in vision like the optical space of psychophysics and of neural elaboration the qualitative space of phenomenal appearances and its relation with the pictorial space of art The contributors to the volume agree in arguing that those spaces follow different rules of organization whose specific singularity and reciprocal dependence have to be individuated as a preliminary step to understand the architecture of the conscious awareness of our environment and to conceive its potential implementation in constructing any kind of embodied intentional agents Series B
