The Organization and Retrieval of Economic Knowledge Mark Perlman,1977-07-20 **The Organization and Retrieval of Economic Knowledge** Mark Perlman,2016-01-03 **The Organization and Retrieval of Economic Knowledge** Mark Perlman,2019 Originally published in 1977 A collection of the eleven sessions of a conference in August of 1973 to discuss the library problem The library problem relates to the increasing costs of acquiring storing and providing intelligent access to scholarly material It is not a problem confined to economics libraries **The Organization and Retrieval of Economic Knowledge** Elliot Perlman,2019-06-10 This book is an outcome of the conference on The Organization and Retrieval of Economic Knowledge held in Kiel West Germany It focuses on the technology of the library industry and its uses for economic research and the economics of the economics library industry and its implication **Economic Laws and Economic History** Charles P. Kindleberger,1997-07-24 In this volume Charles Kindleberger makes a powerful case against the idea that any one model could be used to unlock the basic secret of economic history It is essentially an exercise in methodology addressed to economists and economic historians alike He argues that too many economists discover a relationship or a uniformity in economic behaviour develop a model and use it to explain more than it is capable of including on occasion all economic behaviour These lectures discuss four laws in economics to show how uniformities can illuminate economic history in particular aspects They illustrate the view that the economist or economic historian seeking to test analysis against historical data should have a variety of different models and not just one The implication is that however scientific and technical the tools choosing them carefully to fit particular circumstances is itself an art **Economics for the Twenty-first Century: The Economics of the Economist-fox** Andrew M. Kamarck,2017-09-08 This title was first published in 2001 To be effective economics must take into consideration the complex nature of human beings and the contextual institutional social and historical factors at play This text is designed to help economists to be economic foxes by increasing the range of economists tools drawing on the knowledge and experience of other disciplines to cope better with the extraordinary complexity of the modern economy The objective is to provide the same kind of revelation in understanding an economy that an artist possesses in the visual arts A beginner looking at a still life sees a green bottle a red apple and a yellow cloth on a table top An artist however can point out to him all the nuances of colour Following a rapid dissection of the canonical hypotheses of contemporary economic theory different sectors of the real economy are explored the corporation corporate governance services the public sector civil society professions social capital national cultures and the tropics

Communication Informatics and Librarianship in India S. P. Agrawal,Pushpa Rani Sharma,1992 *Communication Economics and Development* Meheroo Jussawalla,D.M. Lamberton,2017-05-17 Communication Economics and Development aims to determine a methodology for integrating communication variables into economic development models The first five chapters of the book cover the theoretical issues and their conceptualization as the basis for deriving a better understanding

of the role of communication in economic development The major issues for concern are the economic variables that are endogenous to communication planning in the light of rapid advances in communication technologies Chapters 6-9 deals with the consideration of the role of communication in national development the international trade theory and communications and the political economy of information in a changing international economic order The Japanese experience in focusing on the role of communication in economic development a model for predicting development benefits from telecommunication investment and the role of telecommunications in developing countries are also discussed The text further describes the impact of telecommunication and information in development planning strategy the opportunity costs in computer conferencing during and for economic development and the evaluation of the impact of communication on agricultural development in Nepal The use of economic concepts in communication planning practice is also discussed

Economics and the Real World Andrew M. Kamarck, 2016-11-11

Drawing on a lifetime of distinguished work in economic research and policymaking Andrew Kamarck details how his profession can more usefully analyze and solve economic problems by changing its basic approach to research Kamarck contends that most economists today strive for a mathematical precision in their work that neither stems from nor leads to an accurate view of economic reality He develops elegant critiques of key areas of economic analysis based on appreciation of scientific method and knowledge of the limitations of economic data Concepts such as employment market and money supply must be seen as loose not exact Measurement of national income becomes highly problematic when taking into account such factors as the so called underground economy and currency differences World trade analysis is based on inconsistent and often inaccurate measurements Subtle realities of the individual social and political worlds render largely ineffective both large scale macroeconomics models and micro models of the consumer and the firm Fashionable cost benefit analysis must be recognized as inherently imprecise Capital and investment in developing countries tend to be measured in easy but irrelevant ways Kamarck concludes with a call for economists to involve themselves in data collection to insist on more accurate and reliable data sources to do analysis within the context of experience and to take a realistic incremental approach to policymaking Kamarck's concerns are shared by many economists and his eloquent presentation will be essential reading for his colleagues and for those who make use of economic research
