The Organizational Complex Architecture Media And Corporate Space:

The Organizational Complex Reinhold Martin, 2005-09-23 A historical and theoretical analysis of corporate architecture in the United States after the Second World War The Organizational Complex is a historical and theoretical analysis of corporate architecture in the United States after the Second World War Its title refers to the aesthetic and technological extension of the military industrial complex in which architecture computers and corporations formed a network of objects images and discourses that realigned social relations and transformed the postwar landscape In depth case studies of architect Eero Saarinen's work for General Motors IBM and Bell Laboratories and analyses of office buildings designed by Skidmore Owings Merrill trace the emergence of a systems based model of organization in architecture in which the modular curtain wall acts as both an organizational device and a carrier of the corporate image Such an image of the corporation as a flexible integrated system is seen to correspond with a humanization of corporate life as corporations decentralize both spatially and administratively Parallel analyses follow the assimilation of cybernetics into aesthetics in the writings of artist and visual theorist Gyorgy Kepes as art merges with techno science in the service of a dynamic new pattern seeing Image and system thus converge in the organizational complex while top down power dissolves into networked pattern based control Architecture as one among many media technologies supplies the patterns images of organic integration designed to regulate new and unstable human machine assemblages

The Organizational Complex Reinhold Martin, 2001 The Oxford Handbook of Media, Technology, and Organization Studies Timon Beyes, Robin Holt, Claus Pias, 2020 This Handbook explores the largely uncharted territory of media technology and organization studies and interrogates their foundational relations their forms and their consequences The chapters consider how specific mediating technological objects such as the Clock or the Smartphone help us to create organizational form

Small, 2024-10-08 A major rethinking of twentieth century abstract art mobilized by the work of Brazilian artist Lygia Clark What would it mean to treat an interval of space as a line thus drawing an empty void into a constellation of art and meaning laden things In this book Irene Small elucidates the signal discovery of the Brazilian artist Lygia Clark in 1954 a fissure of space between material elements that Clark called the organic line For much of the history of art Clark's discovery much like the organic line has escaped legibility Once recognized however the line has seismic repercussions for rethinking foundational concepts such as mark limit surface and edge A spatial cavity that binds discrepant entities together the organic line transforms planes into flexible topologies borders into membranes and interstices into points of connection As a paradigm the organic line has profound historiographic implications as well inviting us to set aside traditional notions of influence and origin in favor of what Small terms weak links and plagiotropic relations These fragile oblique and transversal ties have their own efficacy and Small's innovative readings of canonical modernist works such as Kazimir Malevich's *Black Square* John Cage's *4 33* and Le Corbusier's *machine habiter* as well as contemporary works by such artists as Adam Pendleton Ricardo Basbaum and Mika Rottenberg reveal the organic line's remarkable potential as an analytic instrument Mobilizing a rich repertoire of archival sources and moving across multiple chronologies geographies and disciplines this book invites us to envision modernism not as a stable construct defined by centers and peripheries inclusions and exclusions but as a topological field of interactive destabilizing tensions More than a history of a little known artistic device *The Organic Line Toward a Topology of Modernism* is a user's guide and manifesto for reimagining modern and contemporary art for the
