

Man's theory about his origin.

- **The Evolutionary Theory** of the origin of man: Human evolution is the lengthy process of change by which people originated from apelike ancestors. According to thorough-going naturalistic evolution, man descended from the lower animals, body and soul, by a perfectly natural process, controlled entirely by inherent forces.
- **Theory of Panspermia** as the origin of man: is that life did not begin on Earth at all, but was biologically brought here from elsewhere in space, most likely aboard a meteorite. It suggests that microbes transmitted to Earth from space are responsible for the origin of life. The theory also states that evolution of life to higher forms is dependent on the genetics of the original microbe(s) that came from space.
