The Other Heidegger:

Heidegger, Levinas, Derrida: The Question of Difference Lisa Foran, Rozemund Uljée, 2016-09-30 This book explores the relation between Heidegger Levinas and Derrida by means of a dialogue with experts on the work of these mutually influential thinkers Each essay in this collection focuses on the relation between at least two of these three philosophers focusing on various themes such as Alterity Justice Truth and Language By contextualising these thinkers and tracing their mutually shared themes the book establishes the question of difference and its ongoing radicalization as the problem to which phenomenology must respond Heidegger's influence on Derrida and Levinas was quite substantial Derrida once claimed that his work would not have been possible without the opening of Heidegger's questions Equally as peers Derrida and Levinas commented on and critiqued each other's work By examining the differences between these thinkers on a variety of themes this book represents a philosophically enriching project and essential reading for understanding the respective projects of each of these philosophers

A Guide to Heidegger's Being and Time Magda King, 2001-01-01 An indispensable guide to the major work of one of the twentieth century's most influential thinkers

Origins of the Other Samuel Moyn, 2005 Restoring Levinas to the intellectually rich and combative atmosphere of interwar Europe *Origins of the Other* overturns a number of views that have attained almost stereotypical familiarity In a careful overview of Levinas's career Moyn documents the philosopher's early allegiance to the great German thinker Martin Heidegger Showing that Levinas crafted an idiosyncratic vision of Judaism rather than returning to any traditional source Moyn makes the startling suggestion that Protestant theology as it spread across the continent in new forms may have been the most plausible source of Levinas's core concept

Heidegger in the Twenty-First Century Tziovani Georgakis, Paul J. Ennis, 2015-03-02 The current volume is comparative and interdisciplinary and it provides a reflection on what thinking might become after Heidegger's philosophy Its aim is to critically expand the current field of research by presenting unfamiliar and uncharted avenues that will guide and carry the Heidegger scholarship into the twenty first century By doing so it addresses fundamental questions in the Heideggerian scholarship including its problems restraints and future direction It also engages and broadens the increasingly disparate approaches to Heidegger's work whether those approaches are traditional in their employment of phenomenology and hermeneutics or whether they apply to Heidegger's thinking in new and surprising ways The first section of the volume emphasizes the importance of methodology for the future of Heidegger studies while the second section examines the historical ethical and vocal poetical in Heidegger's thought and draws conclusions relevant to the Heidegger scholar of today The final section demonstrates Heidegger's appeal to a variety of other discourses besides philosophy and the way his thinking could be creatively approached utilized and implemented in our century Contributions come from cutting edge scholars such as Babette E Babich Dermot Moran François Raffoul and Trish Glazebrook

Time, Space, and Ethics in the Thought of Martin Heidegger, Watsuji Tetsuro, and Kuki Shuzo Graham

Mayeda,2006-06-27 In this book Graham Mayeda demonstrates how Watsuji Tetsuro and Kuki Shuzo two twentieth century Japanese philosophers criticize and interpret Heideggerian philosophy articulating traditional Japanese ethics in a modern idiom

Altruism or the Other as the Essence of Existence Iraklis Ioannidis,2021-03-22 Iraklis Ioannidis offers fresh yet radical philosophical insights into the much contested topic of altruism Whereas the debate on altruism since time immemorial consists in trying to determine whether we are biologically altruistic or not Ioannidis explores altruism otherwise Following Nietzsche he traces altruism to the phenomenon of promising or giving one's word His analysis provokes us to think that our possibility to exist cannot be realized without this event Ioannidis passage to altruism attempts to perform altruism while exploring it By reversing the axioms of classical phenomenology what he calls unbracketing he welcomes in his writing space any discourse any human expression which could help the philosophical investigation

Welcoming the Other N. Susan Laehn,Thomas R. Laehn,2021-02-15 The modern turn in political philosophy established the ontological primacy of the ego reducing the community to a mere assemblage of individuals and led to the repudiation of natural duties in favor of inherent individual rights The modern project culminated in the work of Friedrich Nietzsche whose emphasis on radical individuation left human beings both liberated and exiled Individuals were free to create and to recreate themselves anew but they were simultaneously uprooted from any larger community Indeed the very possibility of shared meaning let alone shared political life was called into question This volume consists of essays addressing the efforts of philosophers artists caretakers and perhaps most importantly teachers to reestablish a foundation for political life in postmodernity The origins of these efforts are diverse and their modes are varied Individuals seek communion with the divine either with or through others they pursue friendship among strangers and they search for meaningful relationships in both the classroom and the public square Reflecting the various means by which individuals seek communion with others and with the transcendent divine Other the essays contained in this volume explore the modes through which individuals forge relationships with others in an age of isolation

The Question of God in Heidegger's Phenomenology George Kovacs,1990-06 Several philosophers have developed theological perspectives out of Heidegger's ontology Yet the question of God in Heidegger's thought itself has never received full elucidation In this revealing new study George Kovacs poses the problem of analyzing the idea of God as a process of questioning and thus subjects Heidegger's phenomenological existentialism to a process of exposition Heidegger himself employed

On Heidegger's Being and Time Simon Critchley,Reiner Schürmann,2020-04-15 *On Heidegger's Being and Time* is an outstanding exploration of Heidegger's most important work by two major philosophers Simon Critchley argues that we must see *Being and Time* as a radicalization of Husserl's phenomenology particularly his theories of intentionality categorial intuition and the phenomenological concept of the a priori This leads to a reappraisal and defense of Heidegger's conception of phenomenology In contrast Reiner Schürmann urges us to read Heidegger backward arguing that his later work is the key to unravelling *Being and Time* Through a

close reading of *Being and Time* Sch rmann demonstrates that this work is ultimately aporetic because the notion of Being elaborated in his later work is already at play within it This is the first time that Sch rmann s renowned lectures on Heidegger have been published The book concludes with Critchley s reinterpretation of the importance of authenticity in *Being and Time* Arguing for what he calls an originary inauthenticity Critchley proposes a relational understanding of the key concepts of the second part of *Being and Time* death conscience and temporality

Heidegger and Development in the Global South Siby K. George, 2015-03-05 Taking the Heideggerian critical ontology of technology as its base this volume looks at postcolonial modernization and development in the global south as the worldwide expansion of the western metaphysical understanding of reality We live today in an increasingly globalizing technological society that Martin Heidegger described in the middle of the last century as the planetary imperialism of technologically organized man Consequent upon this cultural intellectual globalization the ahistorical violent individualistic calculative and capitalistic logic of the metaphysics of technology is permeating the life world even of the world s poorest peoples in ways they could neither choose nor control This volume questions the political ethics and justice of post war development discourse in the light of the egalitarian aims of modern societies cultural freedom of communities and nations and the ecological limits of the planet The final chapters discuss the alternative proposal of development as various conceptions of good life and equitable human flourishing amidst equally flourishing non human life and non living beings This unique volume is the first book length treatment of the ontology of modernization and development in the global south from a Heideggerian stance
