Group Counseling and Psychotherapy With Children and Adolescents Zipora Shechtman, 2017-09-25

Many children and adolescents face developmental or situational difficulties in areas where they live most of their meaningful experiences: at home, at school, and in the community. While adults who struggle with life events and stressors may look to professional help, young individuals are quite alone in coping with these situations. Perhaps unsurprisingly, most children and adolescents typically do not seek such help and often resist it when offered. Author Zipora Shechtman has written this detailed text advocating group counseling and psychotherapy as a viable means of addressing these issues if we are to ensure the psychological wellness of children in society.

Group Counseling and Psychotherapy With Children and Adolescents is arranged in four parts. Its chapters explore topics including who needs group counseling and psychotherapy, therapeutic factors in children's groups, activities in the group, pre-group planning and forming a group, and how to enhance emotional experiencing and group support. This text is a principal source of information for counseling psychology students, researchers, and practitioners working with young people, in addition to social workers, teachers, and parents.

Modern Applications to Group Work Kevin A. Fall, Justin E. Levitov, 2001

The effectiveness of group counseling as a treatment modality has been well established. And while additional theoretical work will always be needed, perhaps the greater challenge for contemporary group practitioners lies in crafting theoretically sound applications of group theory so that group methods can be used more effectively to benefit clients struggling with various psychological and developmental problems. This book responds to this need by offering fourteen chapters of creative, useful examples of how group methods can be successfully applied to a wide range of problems and populations. Each chapter, written by innovators from the fields of counseling, social work, psychology, and psychiatry, focuses on specific mental health problems or issues that will interest a wide population. A careful analysis of each psychological or development problem greets the reader, followed by a discussion of the theoretical basis for the interventions. Each chapter utilizes practical recommendations, outlines of procedures, and liberal use of case examples to illuminate important process points.

Each broad category—Adults, Children and Adolescents, and Training and Theory—includes interesting chapter topics such as Group counseling with late-deafened adults, Marital restoration groups, Therapist's uses of self in group psychotherapy, and Group play therapy with abused children. The elegant combination of theory and practice offers the reader a range of easily implemented methods and techniques applied to each specified problem.

Modern Applications to Group Work is a valuable companion text for any group-oriented course. Undergraduate and graduate courses in group can use the text to illustrate the application of general group principles to specific psychological concerns. **Modern Applications to Group Work** may be used as the primary text for advanced courses in group counseling, psychology, and social work programs. Practitioners will be attracted to the book due to its comprehensive scope and the strong theoretical basis of
