quality of each interaction Programs developed in the Educational Technology Center at the University of California Irvine illustrate the critical idea of tutorial learning with computers Production of tutorial learning material and costs for a student hour of learning is discussed The book ends with suggestions for future progress Current hardware and software is fully adequate for the tasks described Development of all required learning units is a major activity After this development both better quality of learning and lower costs are very likely Further experimental work is essential to understand the possibilities Western-Pacific Region Individual Development Plan (IDP) Program United States.
