Soft And Hard:

Soft Computing, 2005 Soft, Hard, And Hybrid Janus Structures: Synthesis, Self-assembly, And Applications Zhiqun Lin, Bo Li, 2017-10-24 This book investigates recent progress in synthesis of soft hard and hybrid Janus structures and looks at processing strategy such as emulsion polymerization microfluidics co jetting and seeded growth Also reviewed are both the experimental and theoretical studies on the unique self assembly behaviour of Janus particles Janus particles are special types of nanoparticles whose surfaces have two or more distinct physical properties These two hemistuctures are of different composition and functionality offering promising potential for application through the multiple combinations possible areas in which Janus structures can be applied include drug delivery magnetic biomarkers bactericides tailored plasmon resonance photocatalysis and nanoengines Encapsulating a wealth of research on Janus structures this review of the literature is specifically designed to benefit graduate students and researchers in the fields of chemistry materials science engineering biotechnology and applied physics as well as practitioners in these industries The Soft-Hard Tissue Junction Neil D. Broom, Ashvin Thambyah, 2018-11-29 Richly illustrated throughout with actual tissue images this innovative book shows that the soft hard tissue junction is best understood in a biomechanical context The authors describe their pioneering experimental methods providing an essential structure function framework for computational modelling and thereby encouraging the development of more realistic predictive models of this important tissue junction Covering the three main musculoskeletal junctions of cartilage bone disc vertebra and ligament tendon bone the relevant soft tissues are examined with respect to both their own inherent structure and their mode of integration with the hard tissue The soft hard tissue interface is explored with a focus on structural damage resulting from overloading and its associated pathologies Adopting a multiscale approach ranging in structural resolution from the macro to fibril levels this is a must have guide to the field and an ideal resource for researchers seeking new and creative approaches for studying the joint and spine tissues

Understanding Solids Richard J. D. Tilley, 2005-09-27 A modern introduction to the subject taking a unique integrated approach designed to appeal to both science and engineering students Covering a broad spectrum of topics this book includes numerous up to date examples of real materials with relevant applications and a modern treatment of key concepts The science bias allows this book to be equally accessible to engineers chemists and physicists Carefully structured into self contained bite sized chapters to enhance student understanding Questions have been designed to reinforce the concepts presented Includes coverage of radioactivity Reflects a rapidly growing field from the science perspective

Characterisation of Soft Magnetic Materials Under Rotational Magnetisation Stanislaw Zurek, 2017-11-22 The book presents practical aspects related to the measurement of rotational power loss in soft magnetic materials The book furthermore focuses on practical aspects of performing such measurements the associated difficulties as well as solutions to the most common problems Numerous practical aspects hands on experience and most commonly encountered pitfalls are

heavily discussed in the book The text begins with introduction to magnetism then follows with definitions of measurement methods of rotational power loss from physical viewpoint Two chapters describe and detail the various sensors which can be employed for such measurements as well as all the aspects of designing making and using a magnetising apparatus A synthesis of the likely optimal design of a magnetising apparatus is also given preceded with the full reasoning based on all the research carried out to date Characterisation of Soft Magnetic Materials Under Rotational Magnetisation serves as an excellent starting point for any student having to perform magnetic measurements under rotational magnetisation but also under 1D 2D or 3D excitation Because the methods sensors and apparatus are extensively discussed it will also be a great reference for more senior researchers and experts in the field There is a whole chapter devoted to analysis of measurement uncertainty This subject is rarely published for magnetic measurements which makes it more difficult for all researchers to understand the concepts and methodology used in uncertainty estimation This chapter not only introduces the whole subject but also provides multiple step by step examples which can be easily followed from very simple cases to much more complex ones All equations are presented with full SI units which greatly helps in practical application of the presented methodology Each chapter is written in such a way that it can be studied on its own so that the reader can focus only on the specific aspects as required

Advanced Technologies, Systems, and Applications III Samir Avdaković, 2018-11-03 This book introduces innovative and interdisciplinary applications of advanced technologies Featuring the papers from the 10th DAYS OF BHAAAS Bosnian Herzegovinian American Academy of Arts and Sciences held in Jahorina Bosnia and Herzegovina on June 21 24 2018 it discusses a wide variety of engineering and scientific applications of the different techniques Researchers from academic and industry present their work and ideas techniques and applications in the field of power systems mechanical engineering computer modelling and simulations civil engineering robotics and biomedical engineering information and communication technologies computer science and applied mathematics

The Philosophers' Secret Fire Patrick Harpur, 2007 Is there any place for the ancient myths of our ancestors in modern times Could their shadowy presence in our common imagination be more influential than we realise Across the globe many societies still believe in an Otherworld of spirits gods and daimons which the West has banished to the unconscious mind and now only visits in dreams Yet this visionary tradition continues to subvert the rational universe erupting out of the shadows in times of intense religious and philosophical transition In his dazzling history of the imagination Patrick Harpur links together fields as far apart as Greek philosophy and depth psychology Renaissance magic and tribal ritual Romantic poetry and the ecstasy of the shaman to trace how myths have been used to make sense of the world He uncovers that tradition which alchemists imagined as a Golden Chain of initiates who passed their mysterious secret fire down through the ages As this inspiring book shows the secret of this perennial wisdom is of an imaginative insight a simple way of seeing that re enchants our existence and restores us to our own true selves

Media Imagery and Political Choice Laura Ann Granka, 2011 The research presented in this manuscript contrasts a text only and graphical display of news to assess the personal and environmental factors affecting news preferences This research was conducted in two stages First an online experiment and survey of 1 000 participants assessed the effects of political attitudes personal demographics and visual cues on news selection behaviors Second an eyetracking study evaluated the ocular and cognitive behaviors associated with the processing of each news display Analyses specifically examined which factors influence i an individual s preferences for hard and soft news ii an individual s preferences for specific news sources and iii how stable or susceptible to change these preferences are over time Results indicate that visual design political attitudes and personal demographics all affect the type of news and source selected Specifically a graphical news layout encourages the selection of soft news categories though this is moderated by education A graphical layout also enables more repeat selections to the same source Furthermore eyetracking shows that a graphical news format produces lower levels of attention and cognitive processing Broader implications for the future of news display and news acquisition are discussed
