

The book cover for 'Soft City' by David Sim features a vibrant, multi-layered illustration. On the left, a cross-section of a multi-story building shows various activities on each floor: a rooftop garden with a person in a white suit, a lounge area with a sofa and armchair, a person vacuuming, a person sitting at a desk, a person lying on a sofa, a person sitting at a desk, a person sitting on a bench, a person sitting at a desk, and a person sitting at a desk. To the right of the building, a street scene unfolds under a clear blue sky. A large green tree stands on the sidewalk. A yellow bus with the word 'Together' on its side is driving on the road. People are walking on the sidewalk, some carrying bags, and a dog is visible. A red and white striped awning is attached to the building. The title 'Soft City' is written in large, bold, yellow letters at the top right. Below the title, the subtitle 'Building Density for Everyday Life' is written in smaller, white letters. At the bottom right, the author's name 'David Sim' and the foreword by 'Jan Gehl' are listed in white text.

Soft City:

Soft City David Sim, 2019-08-20 Imagine waking up to the gentle noises of the city and moving through your day with complete confidence that you will get where you need to go quickly and efficiently Soft City is about ease and comfort where density has a human dimension adapting to our ever changing needs nurturing relationships and accommodating the pleasures of everyday life How do we move from the current reality in most cities separated uses and lengthy commutes in single occupancy vehicles that drain human environmental and community resources to support a soft city approach In Soft City David Sim partner and creative director at Gehl shows how this is possible presenting ideas and graphic examples from around the globe He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale which he presents through a series of observations of older and newer places and a range of simple built phenomena some traditional and some totally new inventions Sim shows that increasing density is not enough The soft city must consider the organization and layout of the built environment for more fluid movement and comfort a diversity of building types and thoughtful design to ensure a sustainable urban environment and society Soft City begins with the big ideas of happiness and quality of life and then shows how they are tied to the way we live The heart of the book is highly visual and shows the building blocks for neighborhoods building types and their organization and orientation how we can get along as we get around a city and living with the weather As every citizen deals with the reality of a changing climate Soft City explores how the built environment can adapt and respond Soft City offers inspiration ideas and guidance for anyone interested in city building Sim shows how to make any city more efficient more livable and better connected to the environment The Art of Urban Living Christian Emden, Catherine Keen, David Midgley, 2006 This volume is based on papers given at the conference Imagining the City held in Cambridge in 2004 Together they examine the city as imagined space and as a matrix for imagined worlds using French German English Italian Russian and North American examples
