Soil Erosion and Water Supplies in Uganda Edward James Wayland, Norman Vincent Brasnett, 1938 *Coupling of Land and Water Systems* A.D. Hasler, 2012-12-06 This volume is concerned with many kinds of links between terrestrial and aquatic ecosystems Ecological systems on land interact with water in many ways that have been treated throughout the Ecological Studies series Volume 1's chapters 16 through 18 on Hydrologic Cycles provide background that leads directly into the description of nutrient hydrologic interactions in Chapter 1 of the present volume Volume 2 treats further aspects of water in forests grassland and crops Volume 3 summarizes biological and environmental aspects of the whole Indian Ocean as a marine ecosystem that is notably influenced by upwelling of water and nutrients along several of its shorelines Volumes 4 and 5 provide a closer look at the movement of water in crops and other woody or herbaceous systems and their soils from viewpoints ranging from that of physics to that of practical agriculture These volumes especially Volume 7 on the evolutionary adaptation of ecosystems to mediterranean types of climates are concerned with the ecosystem's strategies of using water which nature provides on a very seasonal basis Volume 8 treats many aspects of seasonality in a variety of ecosystem types including environmental signals that turn growth on and off at times that are generally appropriate for organisms survival and for effective use of landscapes by mankind **Soil Conservation Literature** United States. Soil Conservation Service. Library, 1939 **Soil Conservation Literature** , 1937 **The Vitality of Karamojong Religion** Ben Knighton, 2017-05-15 How long can a traditional religion survive the impact of world religions state hegemony and globalization The Karamoja problem is one that has perplexed colonial and independent governments alike Now Karamojong notoriety for armed cattle raiding has attracted the attention of the UN and USAID since the proliferation of small arms in the pastoralist belt across Africa from Sudan to stateless Somalia is deemed a threat to world security The consequences are ethnocidal but what makes African peoples stand out against state and global governance The traditional African religion of the Karamojong despite the multiple external influences of the twentieth century and earlier has remained at the heart of their culture as it has changed through time Drawing on oral accounts and the language itself as well as his extensive experience of living and working in the region Knighton avoids Western perspectivism to highlight the successful reassertion of African beliefs and values over repeated attempts by interventionists to replace or subvert them Knighton argues that the religious aspect of Karamojong culture with its persistent faith dimension is one of the key factors that have enabled them to maintain their amazing degree of religious political and military autonomy in the postmodern world Using historical and anthropological approaches the real continuities within the culture and the reasons for mysterious vitality of Karamojong

religion are explored **The Adaptive Water Resource Management Handbook** Jaroslav Mysiak, Hans Jorgen Henrikson, Caroline Sullivan, John Bromley, Claudia Pahl-Wostl, 2013-09-13 The complexity of current water resource management poses many challenges Water managers need to solve a range of interrelated water dilemmas such as balancing water quantity and quality flooding drought maintaining biodiversity and ecological functions and services in a context where human beliefs actions and values play a central role Furthermore the growing uncertainties of global climate change and the long term implications of management actions make the problems even more difficult This book explains the benefits outcomes and lessons learned from adaptive water management AWM In essence AWM is a way of responding to uncertainty by designing policy measures which are provisional and incremental subject to subsequent modification in response to environmental change and other variables Included are illustrative case studies from seven river basins from across Europe West Asia and Africa the Elbe Rhine Guadiana Tisza Orange Nile and Amudarya These exemplify the key challenges of adaptive water management especially when rivers cross national boundaries creating additional problems of governance
