Speech And Communication Disorder In Psychiatry

Rosemary Gravell

Speech And Communication Disorder In Psychiatry:

Speech and Communication Problems in Psychiatry ,2013-12-20 This volume represents a painstaking and scholarly introduction to the management of children and adults who have problems of communication related to or in addition to mental disorder It is a relatively unexplored field having received scant attention until recent years but the quality of the work included here gives a clear indication that the area should move from the periphery into a main stream position in the education and practice of speech therapists Although all students in training receive some teaching in the area of psychiatry it tends to be limited to a brief consideration of the role of the psychiatrist and clinical psychologist very rarely the speech therapist It has been proposed that the education of the speech therapist who intends to enter this difficult but rewarding field should be developed at post graduate level and there are strong arguments given in this volume to support the idea Claims that the field is neglected during initial training are however well founded and this volume should alert those responsible for the education of speech therapists to this deficiency

Communication Disability and the Psychiatry of Old

Age Karen Bryan, Jane Maxim, 2010-09-07 This book discusses management of communication disorders in the psychiatry of old age. The contribution of the speech and language therapist is the focus of the book but this is described within the context of the multidisciplinary team. Language change and language assessment in psychiatric disorders associated with old age, especially dementias, are described in detail. The form of service delivery offered is fundamental to the speech and language therapy intervention that can be offered to this complex and often neglected client group. A management perspective and service delivery in the USA and in the UK are described. Working with carers, service delivery in the community, an innovative scheme involving residential homes, a review of how community care initiatives have affected speech and language therapy services, and an analysis of service audit are all included. As well as giving a description of speech and language therapy intervention with the elderly who have psychiatric disorders, the book also highlights the issues and challenges facing clinicians who work within the reformed health service. It should be of considerable interest to speech and language therapists, other health care professionals, and students who work with older mentally ill people. Purchasers and managers who are commissioning and providing services for the older population with psychiatric disorders should also find the book useful.
