Anticipation and Anachrony in Statius' Thebaid Robert Simms, 2019-10-03 Applying the latest narratological theory and focusing on the use of anachrony or chronological deviation this book explores how Statius competes successfully for a place within an established literary canon Given the tremendous pressure on poets to render familiar stories in unfamiliar and novel ways how did he achieve this When Statius elected to sing of the quarrelsome sons of Oedipus he was acutely aware that this was a well trod road one frequently reproduced in a variety of genres epic drama and lyric poetry Despite this highly varied corpus against which he sought to contend he boasts that his epic has novelty and proudly declares that he is now counted among the *prisca nomina* or ancient names that sang of Thebes And indeed precisely the fact that there were so many story versions a greater number survive for comparison than for any other work from antiquity rivaling even the popularity of the Trojan legend means that the story is conveniently positioned to offer a unique exploration into how Statius creates a compelling story despite working within a saturated and overly familiar mythic tradition This book argues that it is chiefly through the use of narrative anachrony or non chronological modes of narration that Statius manipulates states of anticipation suspense and even surprise in his audience *Flavian Rome* Anthony Boyle, William J. Dominik, 2002-10-31 The politics literature and culture of ancient Rome during the Flavian principate 69-96 CE have recently been the subject of intense investigation In this volume of new specially commissioned studies twenty five scholars from five countries have combined to produce a critical survey of the period which underscores and re evaluates its foundational importance Most of the authors are established international figures but a feature of the volume is the presence of young emerging scholars at the cutting edge of the discipline The studies attend to a diversity of topics including the new political settlement the role of the army change and continuity in Rome's social structures cultural festivals architecture sculpture religion coinage imperial discourse epistemology and political control rhetoric philosophy Greek intellectual life drama poetry patronage Flavian historians amphitheatrical Rome All Greek and Latin text is translated *Writing Politics in Imperial Rome* W.J. Dominik, J. Garthwaite, P.A. Roche, 2009-05-15 Roman literature is inherently political in the varied contexts of its production and the abiding concerns of its subject matter This collection examines the strategies and techniques of political writing at Rome in a broad range of literature spanning almost two centuries differing political systems climates and contexts It applies a definition of politics that is more in keeping with modern critical approaches than has often been the case in studies of the political literature of classical antiquity By applying a wide variety of critically informed viewpoints this volume offers the reader not only a long view of the abiding techniques strategies and concerns of political expression at Rome but also many new perspectives on individual authors of the early empire and their republican precursors **Brill's Companion to the**

Reception of Euripides, 2015-09-01 Brill's Companion to the Reception of Euripides provides a comprehensive account of the influence and appropriation of all extant Euripidean plays since their inception from antiquity to modernity across cultures and civilizations from multiple perspectives and within a broad range of human experience and cultural trends namely literature intellectual history visual arts music opera and dance stage and cinematography A concerted work by an international team of specialists in the field the volume is addressed to a wide and multidisciplinary readership of classical reception studies from experts to non experts Contributors engage in a vividly and lively interactive dialogue with the Ancient and the Modern which while illuminating aspects of ancient drama and highlighting their ever lasting relevance offers a thoughtful and layered guide of the human condition *Intertextuality in Flavian Epic Poetry* Neil Coffee, Chris Forstall, Lavinia Galli Milic, Damien Nelis, 2019-12-16 This collection of essays reaffirms the central importance of adopting an intertextual approach to the study of Flavian epic poetry and shows despite all that has been achieved just how much still remains to be done on the topic Most of the contributions are written by scholars who have already made major contributions to the field and taken together they offer a set of state of the art contributions on individual topics a general survey of trends in recent scholarship and a vision of at least some of the paths work is likely to follow in the years ahead In addition there is a particular focus on recent developments in digital search techniques and the influence they are likely to have on all future work in the study of the fundamentally intertextual nature of Latin poetry and on the writing of literary history more generally *Reading the Way to the Netherworld* Ilinca Tanaseanu-Döbler, Gabriela Ryser, 2016-12-05 The volume focuses on the various representations of the Beyond in later Antiquity a period of intense interaction and competition between various religious traditions and ideals of education The concepts and images clustering around the Beyond form a crucial focal point for understanding the dynamics of religion and education in later Antiquity Although Christianity gradually supersedes the pagan traditions the literary representations of the Beyond derived from classical literature and transmitted through the texts read at school show a remarkable persistence they influence Christian late antique writers and are still alive in medieval literature of the East and West A specifically Christian Beyond develops only gradually and coexists subsequently with pagan ideas which in turn vary according to the respective literary and philosophical contexts Thus the various conceptualisations of the great existential unknown serves here as a point of reference for mirroring the changes and continuities in Imperial and Late Antique religion education and culture and opening up further perspectives into the Medieval world
