[The Social Origins of Modern Science](#) P. Zilsel, 2013-03-07 Edgar Zilsel 1891 1944 lived through the best of times and worst of times through the renewal of scientific optimism and humane politics and through the massive social collapse into idolatrous barbarism With it all and with his personal and family crises in Vienna and later in America Zilsel was I believe a truly heroic indeed a model scholar of the first half of the 20 century He was widely admired as a teacher at high schools in workers education in research tutoring and seminars He was an original investigator on matters of the methodology of science and of the history of the sciences He was a social and political analyst as a critical Marxist of the turmoil of Vienna in the 20s Above all he achieved so much as a sociological historian who undertook research on two central facts of the early modern world recognition of the creative individual and the ideal of genius and the conditions and realities of the coming of science to European civilization

[The Origins of Modern Science](#) Ofer Gal, 2021-02-04 This book attempts to introduce to its readers major chapters in the history of science It tries to present science as a human endeavor a great achievement and all the more human for it In place of the story of progress and its obstacles or a parade of truths revealed this book stresses the contingent and historical nature of scientific knowledge Knowledge science included is always developed by real people within communities answering immediate needs and challenges shaped by place culture and historical events with resources drawn from their present and past Chronologically this book spans from Pythagorean mathematics to Newton's *Principia* The book starts in the high Middle Ages and proceeds to introduce the readers to the historian's way of inquiry At the center of this introduction is the Gothic Cathedral a grand achievement of human knowledge rooted in a complex cultural context and a powerful metaphor for science The book alternates thematic chapters with chapters concentrating on an era Yet it attempts to integrate discussion of all different aspects of the making of knowledge social and cultural settings challenges and opportunities intellectual motivations and

worries epistemological assumptions and technical ideas instruments and procedures The cathedral metaphor is evoked intermittently throughout to tie the many themes discussed to the main lesson that the complex set of beliefs practices and institutions we call science is a particular contingent human phenomenon *Companion to the History of Modern Science* G N Cantor,G.N.
