produce the conditions for a Fully Automated Luxury Communism drawing on an interpretation of Marx where human work would be replaced by a life of leisure and abundance for all For others an earlier discourse cybernetics and the use of AI and social media in communication and co ordination enable forms of radical organization through anarchist cybernetics This book questions that technological optimism particularly cybernetics automation and AI through a critique of these technologies and organizational forms Cybernetics and corresponding technologies and forms particularly Industry 4 0 can never capture human forms of creativity and working practices Furthermore there are similar problems with the cybernetic paradigm as a radical form of organization or social movement in terms of human autonomy creativity desire and social prefiguration As counterpoint the book shows through empirical evidence and drawing on interviews with workers or activists in a variety of organizational forms that tacit knowledge and autonomous and spontaneous human projects what the authors define as hobbying are critical in the physical act of making and co operating
