**Omega-6/Omega-3 Essential Fatty Acid Ratio: The Scientific Evidence** A. P. Simopoulos,L. G. Cleland,Berthold Koletzko,2003-07 Studies on the evolutionary aspects of diet and molecular studies included in this volume indicate that human beings evolved on a diet that was balanced in the essential fatty acids EFA In fact the ratio of omega 6 omega 3 EFA was 1 1 whereas present day diets in both developed and developing countries have a much higher ratio between 5 1 and 50 1 Additional studies show that a high ratio of omega 6 omega 3 EFA is detrimental to health and may lead to the development of chronic diseases Improving the dietary ratio by decreasing the omega 6 fatty acids and increasing the omega 3 fatty acids is essential for brain function and for the management of cardiovascular disease arthritis and cancer A ratio of 4 1 or less leads to lower dosage and to the reduction of adverse effects of drugs This volume should be of interest to a large and varied audience of researchers in academia industry and government cardiologists geneticists immunologists neuroscientists and cancer specialists as well as nutritionists dietitians food scientists agriculturists economists and regulators [History of Hydrogenation, Shortening and Margarine \(1860-2020\)](#) William Shurtleff; Akiko Aoyagi,2020-06-05 One of the world s most comprehensive well documented and well illustrated books on this subject With extensive subject and geographic index 106 photographs and illustrations mostly color Free of charge in digital format on Google Books **The Dakota Diet** Kevin
