The Optical Aurora Physics And Chemistry In Space:

The Optical Aurora A. Omholt, 2012-12-06 The aim of this book is to describe and discuss the aurora as an optical phenomenon one which can be observed by the naked eye as well as with more sensitive optical detectors It continues the tradition of studying that impressive and imaginative play of nature the northern lights seen and discussed by the Greek philosophers as early as the sixth century B c Today the study of the optical aurora is only one of many ways of acquiring information about a major phenomenon the ejection of plasma from the sun the interaction of this plasma with the geomagnetic field and the injection of fast particles into the earth's atmosphere of the optical aurora is justified by the Hence the separate treatment particular scientific approach detection and interpretation of electromagnetic radiation approximately in the 1000 100000 Å region produced through interaction between the auroral particles and the earth's atmosphere Other techniques such as radio observations X ray observations direct particle detections from rockets and satellites studies of magnetic storms and measurements of the magnetic field and plasma properties in the magnetosphere are as important or more important than the classical way of studying the optical aurora Nevertheless it was felt worthwhile to treat the optical aurora in a separate book perhaps mainly because today one author cannot master the whole subject with sufficient competence This book is thus one volume in a series of books giving a more complete picture of physics and chemistry in space **The optical aurora** A. Omholt, 1971 *Literature 1971, Part 2* S. Böhme, W. Fricke, U.

Güntzel-Lingner, F. Henn, D. Krahn, U. Scheffer, G. Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 6 contains literature published in 1971 and received before March 15 1972 some older literature which was received late and which is not recorded in earlier volumes is also included Book Catalog of the Library and Information Services Division: Author-title-series indexes Environmental Science Information Center. Space Weather Fundamentals George V. Khazanov, 2016-11-17 Space weather is one of the most significant natural hazards to human life and health Conditions of the sun and in the solar wind magnetosphere ionosphere and thermosphere can influence the performance and reliability of space borne and ground based technological systems If conditions in the space environment are adverse they can cause disruption of satellite operations communications navigation and electric

power distribution grids leading to a variety of socioeconomic losses This book provides an overview of our current knowledge and theoretical understanding of space weather formation and covers all major topics of this phenomena from the sun to the Earth s ionosphere and thermosphere thus providing a fully updated review of this rapidly advancing field The book brings together an outstanding team of internationally recognised contributors to cover topics such as solar wind the earth s magnetic field radiation belts the aurora spacecraft charging orbital drag and GPS
