The Origin:

The Origin of Our Origins Emerson Thomas McMullen B.S. M.S. M.A. Ph.D.,2024-04-18 There is no conflict between the Bible and science that is evidence based The conflict is between belief in the Biblical Worldview and belief in a non biblical worldview If a claim about nature is not testable or observable and then confirmable it is not science Evolution requires belief In his *On the Origin of Species* 1859 Charles Darwin wrote about his belief in the transmutation of species p302 that The theory of natural selection is grounded on belief p320 and that he believed we descended from one common ancestor p484 Darwin believed in evolution because he had no evidence He admitted that the whole volume is one long argument p459 Observations show that biological change is limited and research indicates that evolution is was not by chance mutations Additionally chance does not cause anything It is a philosophical term and may not even exist Finally experiments have repeatedly shown that life does not arise from non life Similarly we did not descend from stardust either Besides violating the principle of cause and effect astronomical discoveries are proving that the Big Bang is science fiction Like evolution chance and life from non life the Big Bang has to be believed *Conflicting Models for the Origin of Life* Stoyan K. Smoukov,Joseph Seckbach,Richard Gordon,2023-03-14 *Conflicting Models for the Origin of Life* provides a forum to compare and contrast the many hypotheses that have been put forward to explain the origin of life There is a revolution brewing in the field of Origin of Life in the process of trying to figure out how Life started many researchers believe there is an impending second creation of life not necessarily biological Up to date understanding is needed to prepare us for the technological and societal changes it would bring Schrodinger s 1944 What is life included the insight of an information carrier which inspired the discovery of the structure of DNA In *Conflicting Models of the Origin of Life* a selection of the world s experts are brought together to cover different aspects of the research from progress towards synthetic life artificial cells and sub cellular components to new definitions of life and the unexpected places life could have emerge d Chapters also cover fundamental questions of how memory could emerge from memoryless processes and how we can tell if a molecule may have emerged from life Similarly cutting edge research discusses plausible reactions for the emergence of life both on Earth and on exoplanets Additional perspectives from geologists philosophers and even roboticists thinking about the origin of life round out this volume The text is a state of the art snapshot of the latest developments on the emergence of life to be used both in graduate classes and by citizen scientists Audience Researchers in any area of astrobiology as well as others interested in the origins of life will find a modern and current review of the field and the current debates and obstacles This book will clearly illustrate the current state of the art and engage the imagination and creativity of experts across many disciplines **The Origin of Life and Evolutionary Biochemistry** K. The Origin of Capitalism in England, 1400-1600 Spencer Dimmock, 2014-06-05 Incorporating original archival research and a series of critiques of recent accounts of economic development in pre modern England in The Origin of Capitalism in England 1400 1600 Spencer Dimmock has produced a challenging and multi layered account of a historical rupture in English feudal society which led to the first sustained transition to agrarian capitalism and consequent industrial revolution Genuinely integrating political social and economic themes Spencer Dimmock views capitalism broadly as a form of society rather than narrowly as an economic system He firmly locates its beginnings with conflicting social agencies in a closely defined historical context rather than with evolutionary and transhistorical commercial developments and will thus stimulate a thorough reappraisal of current orthodoxies on the transition to capitalism

Molecular Evolution: Towards the Origin of Metazoa Werner E.G. Müller, 2012-12-06 Recently new genes and their proteins that revealed striking new insights into the early evolution of multicellular animals have been identified and characterized from members of the lowest metazoan phylum the porifera sponges The unexpected result was that the sequences obtained from sponge displayed high similarity to those found in higher metazoa in consequence it was concluded that during the transition from protozoa to metazoa the major structural and regulatory proteins evolved only once The data gathered are now powerful arguments to establish monophyly of metazoa in addition new insights on the evolutionary diversification of metazoa were obtained

The Origin of Capitalism Ellen Meiksins Wood, 2016-02-16 In The Origin of Capitalism a now classic work of history Ellen Meiksins Wood offers readers a clear and accessible introduction to the theories and debates concerning the birth of capitalism imperialism and the modern nation state Capitalism is not a natural and inevitable consequence of human nature nor simply an extension of age old practices of trade and commerce Rather it is a late and localized product of very specific historical conditions which required great transformations in social relations and in the relationship between humans and nature

The Origins of Life John Maynard Smith, Eors Szathmary, 2000-03-16 In this fascinating book John Maynard Smith and Eors Szathmary present an original picture of evolution They propose that during evolution there have been a number of major transitions in the way in which information is passed between generations These transitions include the appearance of the first replicating molecules the emergence of co operative animal societies and the unique language ability of humans Containing many new ideas this book is contemporary biology on the grandest scale from the birth of life to the origin of
