Structural Adjustment Global Trade And The New Political:

Structural Adjustment, Global Trade, and the New Political Economy of Development Biplab Dasgupta, 1998 The changes in the global economy are so profound this book argues that the world is now confronted with nothing less in both institutional and policy terms than a new political economy of development The author provides an intellectually commanding survey of this new terrain He subjects its economic and ideological assumptions to trenchant critique and shows how the rules of the game primarily reflect the interests of the rich and powerful countries of the North He also surveys the economic performance of the various regions of the South and explores the real reasons for the success of certain Asian economies reasons which run counter to so many of the policy prescriptions laid down by the West for the rest of the South Public Services and International Trade Liberalization Barnali Choudhury, 2012-11 This book examines whether public service liberalization poses a threat to gender and human rights

Higher Education: Handbook of Theory and Research J.C. Smart,2012-12-06 Marxist Perspectives on South Korea in the Global Economy Martin Hart-Landsberg,Seongjin Jeong,Westra Richard,2017-03-02 This volume brings together work by international scholars to provide a unique analysis of the past present and possible future trajectory of Korea s political economy from a distinctly Marxist perspective The volume differentiates the Marxian approach to the political economy of Korean development from the Keynesian social democratic approach that currently dominates the critical literature In doing so the volume provides a unique view of the development of the South Korean Economy

Iran Revisited Ali Pirzadeh,2016-04-20 This book examines Modern Iran through an interdisciplinary analysis of its cultural norms history and institutional environment The goal is to underline strengths and weaknesses of Iranian society as a whole and to illustrate less prescriptive explanations for the way Iran is seen through a lens of persistent collective conduct rather than erratic historical occurrences Throughout its history Iran has been subject to many studies all of which have diagnosed the country s problem and prescribed solutions based on certain theoretical grounds This book intends to look inward seeking cultural explanations for Iran s perpetual inability to improve its society The theme in this book is based on the eloquent words of Nasir Khusrau a great Iranian poet *az mast ki bar mast* The words are from a poem describing a self adoring eagle that sees its life abruptly ended by an arrow winged with its own feathers the bird is doomed by its own vanity The closest interpretation of this idiom in Western Christian culture is you reap what you sow which conveys a similar message that underlines one s responsibility in the sense that sooner or later we must face the choices we make This would enable us to confront and live up to what Iran s history and culture have taught us

Writing Global Trade Governance

Michael Strange, 2013-08-15 Writing Global Trade Governance operationalises a key post structuralist methodology in order to expand understanding on the institution at the heart of the global political economy Despite the WTO s centrality and the growing popularity of methods utilizing discourse theory no other text has yet demonstrated how these two fields of learning can be productively combined The book seeks to move beyond existing literatures that assume the WTO to be a structure institution or normative framework in order to enquire into the discursive processes of identity formation that make the WTO both possible and contested The book criticises conventional approaches that treat critical civil society as distinct to the WTO arguing instead that it is only through including such social practices within the field of relations making the WTO that we can properly understand what makes the WTO work The book presents an empirical analysis of the discursive character of the present day WTO including its formation and operation and then moves on to evaluate how it is subject to change within a broader social context The final stage of the book seeks to discuss the impact of the findings on future research both on the WTO and other institutions This work is a significant intervention in the literature on the World Trade Organization and the politics of global trade and social movements and will be of great interest to students and scholars of global governance discourse theory and international organizations Confronting Global Neoliberalism Patrick Bond, Paul Clooney, 2011-02-28

With the world s attention fixed on the travails of leading global economies due to a still unfolding financial crisis of gigantic proportions there has been a studied silence on the fate of the third world as the malaise increasingly impacts it This silence is particularly disturbing because questions of potential pitfalls in the neoliberal policy package which the third world unlike Western Europe and Japan was largely forced to adopt were never countenanced as One third world state after another discovered that international institutions were in effect hostile to their governments if they chose alternative developmental models or otherwise resisted the neoliberal triage of liberalization privatization and deregulation This collection is a tour de force effectively countering not only the neoliberal ideology of development as a whole but the marginalizing within today s mainstream crisis discourse of any discussion of the monstrous misallocation of global resources wrought by the so called Washington Consensus and the suffering and destruction it has wreaked on third world peoples and economies This edited volume is intended as both a textbook for introductory classes in global development or area studies and as a conduit for advanced students policymakers NGO activists and an educated readership to gain knowledge about the socio economic conditions existing across much of the world we live in and the policies that brought them about The specially commissioned and peer reviewed chapters are written by experts in the fields of economics politics sociology and international studies Chapter authors hail from around the world including Brazil Mexico Canada United States United Kingdom South Africa South Korea and Thailand The countries regions neoliberal experience and potential futures covered in this book are Brazil China Cuba Egypt Mexico Southeast Asia Indonesia Malaysia and Vietnam South Africa South Korea Syria Thailand and Venezuela **Tourism and Development** Richard Sharpley, David J. Telfer, 2015 This book explores the relationship

between tourism and development and establishes a conceptual link between the interconnected disciplines of tourism studies and development studies This new edition includes updated chapters drawing on contemporary knowledge as well as 5 new chapters that consider emergent themes in tourism and development
