Structural Change In Macroeconomic Models:

Structural Change in Macroeconomic Models M.J. Vilarès, 2012-12-06 This book grew out of a Doctorat D Etat thesis presented at the University of Dijon Institut Mathématique Economiques IME It aims to show that quantity rationing theory provides the means of improving macroeconomic modelling in the study of structural changes The empirical results presented in the last chapter concerning Portuguese economy and in the last Appendix concerning the French economy although preliminary suggested that the effort is rewarding and should be continued My debts are many An important part of the research work was accomplished during my visit to the Institut National de la Statistique et des Etudes Economiques INSEE Paris where I have benefited from stimulating discussions particularly with P Villa and infor matical support I have also received comments and suggestions from R Quandt J J Laffont P Kooiman and P Y Henin I am specially indebted to P Balestra for encouraging and valuable discussions particularly in the field of econometric methods My thanks go also to an anonymous referee His constructive criticism and suggestions resulted in a number of improvements to an earlier version of this book I cannot forget my friend A Costa from BP A Porto who has helped me in the preparation of this work Last but not least I would like to thank my wife for her encouragement and patience throughout these years Of course I am the only one responsible for any remaining errors

Structural Change in Macroeconomic Models Manuel José Vilarès, 1986

Structural Change in Macroeconomic Models Manuel José Vilarès, 1986 *Consumption Structure and Macroeconomics* Reto Foellmi, 2006-03-30 This book offers a novel perspective that allows to incorporate changing consumption and production structure into models of economic growth Starting from the empirical observation that income and consumption structure are closely related it develops a tractable theoretical framework which enables to analyze macroeconomic models consistent with these empirical facts As a result central macroeconomic phenomena are better understood the reasons behind long run growth structural change and the influence of inequality on innovations and growth

Disequilibrium Macroeconomic Models Jean-Paul Lambert, 1988-05-26 *International Macroeconomic Modelling for Policy Decisions* P. Artus, O. Güvenen, 2012-12-06 This book is based on an international conference organised by the Applied Econometric Association AEA on International Macroeconomic Modelling which was held in Brussels at the Commission of the European Communities in December 1983 On behalf of the Applied Econometric Association we would like to extend our thanks to all participants and contributors This conference would not have been possible without the cooperation and support of the Commission of the European Economic Communities and of its Directorate General for Economics and Financial Affairs DGII staff in particular M Emerson A Dramais and also H Serbat of the Paris Chamber of Commerce and Industry Our thanks go also to J P Ancot for his constructive comments concerning the structure of this book We are grateful to M Russo R Maldaque and Y Ullmo for opening the conference with their stimulating review and comments on the use of international macroeconomic models and to R Bird A M Costa A Crockett H Guitton J C Milleron J Paelinck J Waelbroeck for

chairing the scientific sessions P Artus F Gagey O Guvenen vi INTRODUCTION The main focus of this book is to present recent developments in the construction and use of international macroeconomic models Four main aspects are selected i analysis of trade linkages and exchange rate determination ii modelling and simulating the international economy iii international policy coordination iv the use of international macroeconomic models *Macroeconomic Modelling of R&D and Innovation Policies* Ufuk Akcigit, Cristiana Benedetti Fasil, Giammario Impullitti, Omar Licandro, Miguel Sanchez-Martinez, 2021-11-03 This open access book encompasses a collection of in depth analyses showcasing the challenges and ways forward for macroeconomic modelling of R D and innovation policies Based upon the proceedings of the EC DG JRC IEA workshop held in Brussels in 2017 it presents cutting edge contributions from a number of leading economists in the field It provides a comprehensive overview of the current academic and policy challenges surrounding R D as well as of the state of the art modelling techniques The book brings to the forefront outstanding issues related to the assessment of the macroeconomic impact of R D policies and its modelling It speaks to the rising importance of R D and innovation policy and the proliferation of macroeconomic models featuring endogenous technological change The contents of this book will be of interest to both academic and policy audiences working in the fields of R D and innovation **Models for Analyzing Comparative Advantage** David Andrew Kendrick, 1989-11-30 Recent economic history suggests that a key element in economic growth and development for many countries has been an aggressive export policy and a complementary import policy Such policies can be very effective provided that resources are used wisely to encourage exports from industries that can be competitive in the international arena Also import protection must be used carefully so that it encourages infant industries instead of providing rents to industries that are not competitive Policy makers may use a variety of methods of analysis in planning trade policy As computing power has grown in recent years increasing attention has been given to economic models as one of the most powerful aids to policy making These models can be used on the one hand to help in selecting export industries to encourage and infant industries to protect and on the other hand to chart the larger effects of trade policy on the entire economy While many models have been developed in recent years there has not been any analysis of the strengths and weaknesses of the various types of models Therefore this monograph provides a review and analysis of the models which can be used to analyze dynamic comparative advantage *Advances in Econometrics and Modelling* B. Raj, 2013-03-09 During 1985-86 the acquisition editor for the humanities and social sciences division of Kluwer Academic Publishers in the Netherlands visited the University of Florida where I was also visiting while on sabbatical leave from Wilfrid Laurier University as the McKethan Matherly Senior Research Fellow to discuss publishing plans of the faculty He expressed a keen interest in publishing the proceedings of the conference of the Canadian Econometric Study Group CESG that was to be held the following year at WLU This volume is the end product of his interest, endurance and persistence But for his persistence I would have given up on the project Most of the papers though not all included in this volume are based on

presentations at CESG conferences In some cases scholars were invited to contribute to this volume where their research complimented those presented at these conferences even though they were not conference participants Since papers selected for presentation at the CESG conferences are generally the finished product of scholarly research and often under submission to refereed journals it was not possible to publish the conference proceedings in their entirety Accordingly it was decided in consultation with the publisher to invite a select list of authors to submit significant extensions of the papers they presented at the CESG conferences for inclusion in this volume The editor wishes to express gratitude to all those authors who submitted their papers for evaluation by anonymous referees and for making revisions to conform to our editorial process
