

STRUCTURALISM (PSYCHOLOGY)

Structuralism is a school of thought in psychology that attempts to understand human consciousness by examining its underlying components.

EXPLANATION

This approach breaks down mental processes into their smallest possible components and analyzes them. Through this approach, it seeks to understand how these components combine and, together, end up forming complex psychological phenomena.

STRUCTURALISM VS FUNCTIONALISM

Functionalism

The study of how our minds adapt to external stimuli in order to help us survive and thrive in our environments

Structuralism

The study of how our minds make meaning through small step-by-step cognitive processes.

Structuralism A Philosophy For The Human Science:

Structuralism Peter Caws, 2000 No Marketing Blurbs Critical Theory to Structuralism David Ingram, 2014-09-11
Philosophy in the middle of the 20th Century between 1920 and 1968 responded to the cataclysmic events of the time. Thinkers on the Right turned to authoritarian forms of nationalism in search of stable forms of collective identity and purpose. Thinkers on the Left promoted egalitarian forms of humanism under the banner of international communism. Others saw these opposed tendencies as converging in the extinction of the individual and sought to retrieve the ideals of the Enlightenment in ways that critically acknowledged the contradictions of a liberal democracy racked by class, cultural, and racial conflict. Key figures and movements discussed in this volume include Schmitt, Adorno, and the Frankfurt School; Arendt, Benjamin, Bataille, French Marxism, Black Existentialism, Saussure, and Structuralism; Levi-Strauss, Lacan, and Late Pragmatism. These individuals and schools of thought responded to this modernity crisis in different ways but largely focused on what they perceived to be liberal democracy's betrayal of its own rationalist ideals of freedom, equality, and fraternity.

Philosophy and the Human Sciences Robert John Anderson, J. A. Hughes, Wes W. Sharrock, 1986 Practice and the Human Sciences Donald E. Polkinghorne, 2012-02-01
Teachers, nurses, psychotherapists, and other practitioners of care are under pressure to substitute specific prescribed techniques in place of using their own judgment. Donald E. Polkinghorne assembles the case for the return to judgment-based practice for the professions that engage in direct person-to-person interaction with those they serve. Set in the larger context of the technification of society, Polkinghorne draws from Weber, Heidegger, Ihde, Bourdieu, de Certeau, and other philosophers to trace the advancing power of the technological worldview in Western culture and uses Aristotle, Dewey, and Gadamer to help make his case that we should be doing things very differently.

Phenomenology and the Human Sciences J.N. Mohanty, 2012-12-06 *The Return of Grand Theory in the Human Sciences* Quentin Skinner, 1990-09-13
Gadamer, Derrida, Foucault, Habermas, Althusser, and Levi-Strauss are among the major figures discussed in a volume of essays that surveys the most influential developments in social and political thought over the past twenty-five years. **Human Sciences** Jens Hoyrup, 2000-06-08
Human Sciences assesses the importance and value of the humanities historically and philosophically and makes the case for treating them as sciences. Through careful examination of the characteristics they share with the natural and social sciences as well as what distinguishes them from other scientific fields, the book argues that the humanities may be seen to correspond with the German/Latin *Wissenschaft* (*scientia*) that is as systematic, organized bodies of knowledge rather than as branches of knowledge that should necessarily emulate the quantitative and experimental approach of the natural sciences. After analyzing the humanities from historical and philosophical perspectives, the book presents a general philosophy of science that results from an analysis of the features that are shared by the humanities and the natural and social sciences and then applies some of these insights to philosophical problems of particular relevance for the humanities, such as moral philosophy and the relation between art and cognition.

Michel Pêcheux: Automatic Discourse Analysis Michel Pêcheux, 2022-05-20 This volume offers the long awaited overview of the work of the French philosopher and discourse analyst Michel Pêcheux who was the leading figure in French discourse analysis until his death in 1983 The volume presents the first English publication of the work of Pêcheux and his coworkers on automatic discourse analysis It is presented with extensive annotations and introductions written by former colleagues such as Françoise Gadet Paul Henry and Denise Maldidier Outside France French discourse analysis is almost exclusively known as the form of philosophical discourse presented by such authors as Michel Foucault and Jacques Derrida The contemporary empirical forms of French discourse analysis have not reached a wider public to the degree they deserve Through its combination of original texts annotations and several introductory texts this volume facilitates an evaluation of both results and weaknesses of French discourse analysis in general and of the work of Michel Pêcheux and his coworkers in particular

Hermeneutics and the Human Sciences Paul Ricoeur, Paul Ricœur, 2016-08-26 John B Thompson's collection of translated essays forms an illuminating introduction to Paul Ricoeur's prolific contributions to sociological theory

The Great Philosophers: Derrida Christopher Johnson, 2011-09-14 Part of the GREAT PHILOSOPHERS series Jacques Derrida 1930-2004 As critics investigate the death of the author they find Derrida's prints all over the murder weapon No other recent philosopher has aroused so much suspicion or been so badly misrepresented His every idea a tug at the rug beneath us questioning our sense of ourselves our world and the language by which both are articulated Derrida would make uncomfortable reading under any circumstances Add to this an at times vertiginous abstruseness and a following whose deconstructive readings appear to be doing away with writing as we know it and the hostility is understandable Yet as Christopher Johnson shows in this eloquent exhilarating guide deconstruction doesn't mean destruction nor does it involve any con In what may seem mere convoluted cleverness momentous consistencies can be found in Derrida's apparently rarefied rhetoric can be read the most radical relevant commentary we have on the world we inhabit today
