Structure And Contingency Evolutionary Processes In Life And Human Society:

Structure and Contingency John Bintliff, 1999-03-31 The theme of this book is the appropriate methodology for the study of the history of life on earth In particular it focusses on the interplay between form and structure and their importance for understanding the way in which life on earth has evolved **The Hominid Individual in Context** Clive Gamble, Martin Porr, 2005 Rather than explaining the archaeology of stones and bones as the product of group decisions the contributors investigate how individual action created social life This challenge to the accepted standpoint of the Palaeolithic brings new models and theories into the period innovations that are matched by the resolution of the data that preserve individual action among the artefacts The book brings together examples from recent excavations at Boxgrove Schoningen and Blombos Cave and the analyses of findings from Middle and Early Upper Pleistocene excavations in Europe Africa and Asia The results will revolutionise the Palaeolithic as archaeologists search for the lived lives among the empty spaces that remain BOOK JACKET

Archaeology and the Genetic Revolution in European Prehistory Kristian Kristiansen, 2022-08-18 This Element was

written to meet the theoretical and methodological challenge raised by the third science revolution and its implications for how to study and interpret European prehistory The first section is therefore devoted to a historical and theoretical discussion of how to practice interdisciplinarity in this new age and following from that how to define some crucial but undertheorized categories such as culture ethnicity and various forms of migration The author thus integrates the new results from archaeogenetics into an archaeological frame of reference to produce a new and theoretically informed historical narrative one that also invites debate but also one that identifies areas of uncertainty where more research is needed
