Algebraic Methodology and Software Technology Teodor Rus, 2000-05-03 The AMAST movement was initiated in 1989 with the First International Conference on Algebraic Methodology and Software Technology AMAST held on May 21-23 in Iowa City Iowa and aimed at setting the development of software technology on a mathematical basis The virtue of the software technology envisioned by AMAST is the capability to produce software that has the following properties a it is correct and its correctness can be proved mathematically b it is safe such that it can be used in the implementation of critical systems c it is portable i e it is independent of computing platforms and language generations and d it is evolutionary i e it is self adaptable and evolves with the problem domain Ten years later a myriad of workshops conferences and research programs that share the goals of the AMAST movement have occurred This can be taken as proof that the AMAST vision is right However often the myriad of workshops conferences and research programs lack the clear objectives and the

coordination of their goals towards the software technology envisioned by AMAST This can be taken as a proof that AMAST is still necessary *Ensuring Software Reliability* Ann Marie Neufelder, 2018-10-08 Explains how software reliability can be applied to software programs of all sizes functions and languages and businesses This text provides real life examples from industries such as defence engineering and finance It is aimed at software and quality assurance engineers and graduate students
