in memory The contributions in the second part investigate structures with non fixed functions showing that they tend to be connected to a certain submemory sharing their features such as subjectivity and evaluation The concern of the last section is discourse comprising coherence evidentiality politeness and persuasion The book should be stimulating for researchers and students of linguistic core areas as well as those occupied with developmental aspects and theoretical aspects of language It also provides new insights into methods of analysis both in linguistics and in cognitive psychology The individual chapters are comprehensible to linguists who have no background in psychology and to psychologists who have to background in linguistics
