

**CHAPTER 10
PHASE II – RISK RESPONSE:
AUDIT OF THE FINANCING CYCLE**

Answers to Questions

1. Financing activities consist of an entity's transactions to (1) obtain long-term (capital) funds by issuing long-term debt or capital stock; (2) make payments associated with long-term funds, such as payment of interest and dividends; and (3) retire long-term funds by paying off or reacquiring debt or equity obligations. Long-term debt includes notes, mortgages, and bonds. Capital stock includes both common and preferred stock. Often these transactions are recorded in the sales and collections cycle, but they are so significant that additional controls are applied to them.
2. It is common to audit the balance in notes payable in conjunction with the audit of interest expense and interest payable because it minimizes the verification time and reduces the likelihood of overlooking errors in the balance. Once the auditor is satisfied with the balance in notes payable the related interest rates and due dates for each note, it is easy to test the accuracy of accrued interest. If the interest expense for the year is also tested at the same time, the likelihood of omitting a note from notes payable for which interest has been paid is minimized. When there are a large number of notes or a large number of transactions during the year, it is usually too time consuming to completely tie out interest expense as a part of the audit of the notes payable and related accrued interest. Normally, however, there are only a few notes and few transactions during the year.
3. The most important controls the auditor should be concerned about in the audit of notes payable are:
 - 1) The proper authorization for the issuance of new notes (or renewals) to ensure that the company is not being committed to debt arrangements that are not authorized.
 - 2) Controls over the repayment of principal and interest to ensure that no more is paid on the note than is required.
 - 3) Proper records and procedures to ensure that all amounts in all transactions are properly recorded.
 - 4) Periodic independent verification to ensure that all the controls over notes payable are working.
