Student Study Level 3 4:

Full speed ahead Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee, 2010-03-22 Motorsport and aerospace are two industries in which the United Kingdom is a world leader and the Committee believes that the future success of the UK economy will be based on these types of industries Concerns regarding the aerospace included the current US complaint in the World Trade organisation and the Government's right to support the industry through Repayable Launch Investment and that the UK aerospace sector has access to export trade credit at less favourable rates and through a more complex system than other countries In examining the motorsport industry the Committee felt that there was a lack of understanding and effective engagement by Government They are not content with the Government's current plans to take forward its work with the sector through the UK Automotive Council Instead they recommend that the Government establish a dedicated motorsport policy team within the Department for Business Innovation and Skills Small and medium sized enterprises also play a very important role in supporting both sectors but they have been hit worst by the recession and the Government needs to do more to encourage high performance engineering firms to diversify Both sectors require a highly skilled workforce and more needs to be done to align the education system with the skills needs of the industries Finally is the problem of the non green image that both industries have

Advancing Supervision in Clinically Based Teacher Education Rebecca West Burns,Laura Baecher,Jennifer K. McCorvey,2022-02-01 Supervision in teacher education is entering an exciting time In the last decade national reports calling for the transformation of teacher preparation have advocated for greater school university collaboration and increased clinical preparation of teachers AACTE 2018 NCATE 2010 Thus institutions with teacher preparation should be increasingly concerned with the clinical component of their teacher certification programs AACTE 2010 2018 NCATE 2001 NEA 2014 However supervision in teacher preparation has historically been held in low regard Beck Feiman Nemser 2001 The Holmes Group 1986 Hoover O Shea Soder Burns Jacobs Darling Hammond 2014 Gimbert Lee 2011 In fact university supervisors may be the most undervalued actors in the entire teacher preparation equation when one considers the knowledge skills and dispositions they must have to teach about teaching in the field Burns NCATE 2010 Slick 1998 Zeichner 1992 2005 These practices are incredibly problematic for actualizing clinically based teacher education Thus the road to transforming teacher education must involve addressing such long standing misperceptions about what supervision is what purpose it serves and how it can be renewed from an afterthought to become the driving engine of high quality teacher preparation *Advancing Supervision in Clinically Based Teacher Education Advances Opportunities and Explorations* aims to elevate supervision and supervisors as undervalued actors by disseminating high quality manuscripts on this critical area of study The chapters in this book tackle the persistent issue of devaluing and marginalizing supervision in some institutions of higher education by sharing current research illuminating challenges of supervising in the current high stakes accountability climate and offering innovative ideas that can improve supervision in clinically based teacher education *Teaching English Through ELA, Mathematics, Science, and Social Studies* Long Peng,2022-07-21 Accessible and hands on this textbook provides a comprehensive introduction to teaching language through content an approach known as Content Based Language Teaching CBLT A content based language focused approach to teaching in the disciplines is essential to serving the language and disciplinary needs of English learners ELs in the classroom Guided by learning standards and informed by research this book demonstrates how content materials in the English Language Arts ELA Mathematics Science and Social Studies can be harnessed to develop the English language proficiency of ELs as well as advance their disciplinary knowledge and skills Using content materials in ELA Mathematics Science and Social Studies as a starting point this textbook illustrates

how to teach English as an additional language effectively by integrating language instruction with disciplinary teaching It showcases numerous learning and instructional activities complete with targeted language exemplified in sentential and discourse contexts direct instruction teacher modeling guided and individual practices and assessments which are further backed up by detailed discussions of their goals rationales and implementation This textbook also features a discussion of differentiation to address the varied needs of students To further assist readers in determining how to incorporate language instruction Peng identifies extensive possibilities for language teaching that are based on the same content materials and beyond those targeted by sample learning activities Each chapter ends with three types of exercises multiple choice questions open ended discussion questions and problems of application to bolster understanding promote reflection and encourage application Complementing the book are additional online resources including ready to use PowerPoints which are available on the book s webpage at Routledge.com 9780367521134 Covering key issues such as characteristics of effective language instruction differentiation and the challenges associated with CBLT this is an essential text in TESOL methods and content area language teaching as well as an invaluable resource for pre service and in service ESL EFL teachers and content area teachers who are interested in furthering their students language and literacy development
