Technocratic Dreaming Of Very Fast Trains And Japanese Designer Cities

**Lawrence Grossberg, Cary
Nelson, Paula Treichler**

Technocratic Dreaming Of Very Fast Trains And Japanese Designer Cities:

Technocratic Dreaming Paul James, 1990 Technocratic dreaming of very fast trains and Japanese designer cities

APAIS 1991: Australian public affairs information service , *Technopoles of the World* Manuel

Castells, 2014-01-14 Technopoles planned centres for the promotion for high technology industry have become a key feature of national economic development worldwide Created out of a technological revolution the formation of the global economy and the emergence of a new form of economic production and management they constitute the mines and foundries of the information age redefining the conditions and processes of local and regional development This book is the first systematic survey of technopoles in all manifestations science parks science cities national technopoles and technobelt programmes Detailed case studies ranging from the Silicon Valley to Siberia and from the M4 Corridor to Taiwan relate how global technopoles have developed what each is striving to achieve and how well it is succeeding *Technopoles of the World* distills the lessons learnt from the successes and failures embracing a host of disparate concepts and a few myths and offering guidelines for national regional and local planners and developers worldwide *A Short History of Transport in Japan from Ancient Times to the Present* John Andrew Black, 2022-03-18 *A Short History of Transport in Japan from Ancient Times to the Present* is a unique study the first by a Western scholar to place the long term development of Japanese infrastructure alongside an analysis of its evolving political economy Drawing from New Institutional Economics Black offers a historically informed critique of contemporary planning using the example of Japan s historical institutions their particular biases and the power they have exerted over national and local transport to identify how reformed institutional arrangements might develop more sustainable and equitable transport services With chapters addressing each major form of transport Black examines the predominant role of institutions and individuals from seventeenth century shoguns to post war planners in transforming Japan s maritime infrastructure its roads and waterways and its adoption of rail and air transport Using a multidisciplinary comparative and chronological approach the book consults a range of technical cultural and political sources to tease out these interactions between society and technology This spirited new contribution to transport studies will attract readers interested in institutional power the history of transport and the development of future infrastructure as well as those with a general interest in Japan **Technological Change and the City** Patrick Nicol Troy, 1995 This book looks at the complex relationships between cities technology economic factors environmental factors and social factors It points out how the form and structure of today s Australian cities the conditions in our cities and the choices about how we want our cities to be in the future are dependent on the decisions practices activities and investments made yesterday and today Reporting research on the major effects on the city of changes in the retailing industry land use and transport water sewerage and drainage services communications manufacturing and building it describes inter alia how the information age global economics innovation in the production system and environmental considerations are changing not only the way life is lived and

business is done in the city but also how urban space is used and organised and how in turn these changes raise important social questions and challenge the very meaning of what constitutes a city Japan-Bashing Narrelle Morris,2013-01-11 The aim of this book is to examine and analyse the phenomenon of Japan bashing from its invention and popularisation in the United States in the late 1970s to the emergence of other national variants including in Australia and Japan to its gradual decline in the late 1990s It is the first major book length study of Japan bashing from a multinational perspective one that attempts to place Japan bashing in its proper historical context and to examine its operation and legacy in the twenty first century Despite its importance in the study of discourses about Japan as well as in understanding broader global changes in the late twentieth century and beyond the phenomenon of Japan bashing remains largely neglected in published writings Moreover it is a far more complex phenomenon than has been assessed thus far While on first glance Japan bashing merely seems to recall other periods in which Japan has been viewed as a dangerous other to the West such as the Western emphasis on the yellow peril from the late nineteenth century as well as Allied anti Japanese propaganda during World War II Japan bashing also had its own distinctive characteristics Moreover while Japan bashing is often described as a quaint historical rather than a pressing contemporary phenomenon it is actually by no means extinct The ongoing influence of Japan bashing also has parallels in other bashing phenomena such as China bashing This book will be of interest to scholars and postgraduate students in Japanese studies and international relations Routledge Companion to Creativity and the Built Environment Julie T. Miao,Tan Yigitcanlar,2024-03-29 This book crtically examines the reciprocal relationship between creativity and the built environment and features leading voices from across the world in a debate on originating learning modifying and plagiarizing creativities within the built environment The Companion includes contributions from architecture design planning construction real estate economics urban studies geography sociology and public policies Contributors review the current field and proposes new conceptual frameworks research methodologies and directions for research policy and practice Chapters are organised into five sections each drawing on cross disciplinary insights and debates Section I connects creativity productivity and economic growth and examines how our built environment stimulates or intimidates human imaginations Section II addresses how hard environments are fabricated with social cultural and institutional meanings and how these evolve in different times and settings Section III discusses activities that directly and indirectly shape the material development of a built environment its environmental sustainability space utility and place identity Section IV illustrates how technologies and innovations are used in building and strengthening an intelligent real time responsive urban agenda Section V examines governance opportunities and challenges at the interface between creativity and built environment An important resource for scholars and students in the fields of urban planning and development urban studies environmental sustainability human geography sociology and public policy Cultural Studies Lawrence Grossberg,Cary Nelson,Paula Treichler,2013-02-01 Featuring new essays by such prominent cultural theorists as Tony

Bennett Homi Bhabha Donna Haraway bell hooks Constance Penley Janice Radway Andrew Ross and Cornel West Cultural Studies offers numerous specific cultural analyses while simultaneously defining and debating the common body of assumptions questions and concerns that have helped create the field Too Soon Too Late Meaghan Morris,1998-08-22 Author Meaghan Morris asks how feminist culture critics can participate in political struggles about history Questioning both contemporary cultural theory that imagines a world beyond history and feminist approaches to culture that minimize questions of economy class and nation Morris argues that history created by popular culture is never truly national in scale or force 11 photos Taming the Great South Land William J Lines,William J. Lines,1991-01-01 Taming the Great South Land is the first full length landscape history of an entire continent occupied by one nation It is also in William Lines s telling a brutal and controversial story Examining the ways European society rapidly radically transformed Australia s physical and human landscapes the author writes candidly of repeated environmental devastation from the early slaughter of seals and whales to the destructive spread of sheep through gold rushes and land settlement to British nuclear tests and the modern mining and timber industries Lines shows how Enlightenment ideas of progress economic growth and development were reconstructed on Australian soil and how the promise of the conquest of nature became a mockery in fact resulting in the mass dislocation and destruction of indigenous populations This shocking narrative thoroughly researched and accessibly written combines environmental social and political history to hard hitting effect Taming the Great South Land is the first full length landscape history of an entire continent occupied by one nation It is also in William Lines s telling a brutal and controversial story Examining the ways European society rapidly radically transformed Australia s physical and human landscapes the author writes candidly of repeated environmental devastation from the early slaughter of seals and whales to the destructive spread of sheep through gold rushes and land settlement to British nuclear tests and the modern mining and timber industries Lines shows how Enlightenment ideas of progress economic growth and development were reconstructed on Australian soil and how the promise of the conquest of nature became a mockery in fact resulting in the mass dislocation and destruction of indigenous populations This shocking narrative thoroughly researched and accessibly written combines environmental social and political history to hard hitting effect

The Enigmatic Realm of **Technocratic Dreaming Of Very Fast Trains And Japanese Designer Cities**: Unleashing the Language is Inner Magic
