Technology And Place Sustainable Architecture And The Blueprint Farm:

Technology and Place Steven A. Moore, 2001-07-15 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm

Technology and Place Steven A. Moore, 2011-01-20 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm an experimental agricultural project designed to benefit farm workers displaced by the industrialization of agriculture in the Rio Grande Valley of Texas Yet despite its promise the very institutions that created Blueprint Farm terminated the project after just four years 1987 1991 In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm He reconstructs the conflicting interests and goals of the founders including Jim Hightower and the Texas Department of Agriculture Laredo Junior College and the Center for Maximum Potential Building Systems and shows how ironically they unwittingly suppressed the self determination of the very farm workers the project sought to benefit From the instructive failure of Blueprint Farm Moore extracts eight principles for a regenerative architecture which he calls his nonmodern manifesto

Architecture & Sustainable Development (vol.1) Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries

Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural technics and the codes that regulate it The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment By providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book

The Green Braid Kim Tanzer, Rafael Longoria, 2007-04-11 This volume presents the discipline s best thinking on sustainability in written drawn and built form drawing on over fifteen years of peer reviewed essays and national design awards published by the Association of Collegiate Schools of Architecture ACSA Providing a primer on sustainability useful to teachers and students alike the selected essays address a broad range of issues Combined with design projects that highlight issues holistically they promote an understanding of the principles of sustainability and further the integration of sustainable methods into architectural projects Using essays that alternately revise and clarify twentieth century architectural thinking The Green Braid places sustainability at the centre of excellent

architectural design No other volume addresses sustainability within the context of architectural history theory pedagogy and design making this book an ideal source for architects in framing their practices and therefore their architectural production in a sustainable manner **The Alcalde** ,2002-07 As the magazine of the Texas Exes The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years The Alcalde serves as an intellectual crossroads where UT s luminaries artists engineers executives musicians attorneys journalists lawmakers and professors among them meet bimonthly to exchange ideas Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater The magazine s unique name is Spanish for mayor or chief magistrate the nickname of the governor who signed UT into existence was The Old Alcalde Sustainable Architectures Simon Guy,Steven A. Moore,2005 As buildings are responsible for fifty per cent of CO2 emissions their design has become the focus of intense technical scrutiny Knowing how to build more technically efficient or ecologically responsible buildings and being able to assemble the social resources to do so requires different forms of knowledge and practice There is wide contestation over the optimal pathways to greener buildings design and great diversity in practices of sustainable architecture This volume brings together leading researchers from across the European Union and North America both to illustrate the diversity of practice and to provide a critical commentary on this key debate The reader is provided with an introduction to competing perspectives on the sustainable architecture debate international exemplars of differing practice and an overview of new theoretical and methodological resources for understanding and meeting the conceptual social and technical challenges of sustainable architecture Constructing a New Agenda A. Krista Sykes,2012-03-20 This follow up to Kate Nesbitt s best selling anthology Theorizing a New Agenda collects twenty eight essays that address architecture theory from the mid 1990s where Nesbitt left off through the present Kristin Sykes offers an overview of the myriad approaches and attitudes adopted by architects and architectural theorists during this era Multiple themes including the impact of digital technologies on processes of architectural design production materiality and representation the implications of globalization and networks of information the growing emphasis on sustainable and green architecture and the phenomenon of the starchitect and iconic architecture appear against a background colored by architectural theory as it existed from the 1960s on in a period of transition if not crisis that centers around the perceived abyss between theory and practice Theory s transitional state persists today rendering its immediate history particularly relevant to contemporary thought and practice While other collections of recent theoretical writings exist none attempt to address the situation as a whole providing in one place key theoretical texts of the past decade and a half This book provides a foundation for ongoing discussions surrounding contemporary architectural thought and practice with iconic essays by Greg Lynn Deborah Berke Sanford Kwinter Samuel Mockbee Stan Allen Rem Koolhaas William Mitchell Anthony Vidler Micahel Hays Reinhold Martin Reiser Umemoto Glenn Murcutt William McDonough Micahael Braungart Michael Speaks and many more **Architectural Regionalism** Vincent

B. Canizaro,2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term Authored by important critics historians and architects such as Kenneth Frampton Lewis Mumford Sigfried Giedion and Alan Colquhoun Architectural Regionalism represents the history of regionalist thinking in architecture from the early twentieth century to today

Technology and Values Craig Hanks,2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics
