Technology And The Human Condition:

Technology and the Human Condition Bernard Gendron, 1976-12 **The Techno-Human Condition** Braden R. Allenby, Daniel Sarewitz, 2011-04-22 A provocative analysis of what it means to be human in an era of incomprehensible technological complexity and change In *The Techno Human Condition* Braden Allenby and Daniel Sarewitz explore what it means to be human in an era of incomprehensible technological complexity and change They argue that if we are to have any prospect of managing that complexity we will need to escape the shackles of current assumptions about rationality progress and certainty even as we maintain a commitment to fundamental human values Humans have been co evolving with their technologies since the dawn of prehistory What is different now is that we have moved beyond external technological interventions to transform ourselves from the inside out even as we also remake the Earth system itself Coping with this new reality say Allenby and Sarewitz means liberating ourselves from such categories as human technological and natural to embrace a new techno human relationship Contributors Boris Barbour Mario Biagioli Paul S Brookes Finn Brunton Alex Csiszar Alessandro Delfanti Emmanuel Didier Sarah de Rijcke Daniele Fanelli Yves Gingras James R Griesemer Catherine Guaspare Marie Andr e Jacob Barbara M Kehm Cyril Labb Jennifer Lin Alexandra Lippman Burkhard Morganstern Ivan Oransky Michael Power Sergio Sismondo Brandon Stell Tereza St ckelov Elizabeth Wager Paul Wouters *Homo Faber* Paolo Benanti, 2018-12-07T10:18:00+01:00 In *Homo Faber* Paolo Benanti seeks to provide a philosophical and theological understanding of the technological phenomenon by casting light contemporaneously on the ethical dimensions connected to it In constructing a holistic vision of technique technology he asks himself how to look at the technological artifacts how it was possible that the West has undergone an incomparable technological development in respect to any other human culture and what this reveals and means for technology and what is the context in which technology is implemented and understood today As a result of his journey Benanti shows how Technology is not a simple human activity but human nature is a techno human condition *Illusions of Freedom* Jeffrey M. Shaw, 2014-06-02 *Illusions of Freedom* examines the opinions and ideas of two twentieth century writers Thomas Merton a Catholic monk living in the United States and Jacques Ellul a French Protestant Contemporaries they never met or corresponded with each other but their critique of the influence that technology was beginning to have on the human condition is strikingly similar Both Merton and Ellul drew upon the ideas of others in formulating their worldview to include Karl Barth Soren Kierkegaard Aldous Huxley and Karl Marx Jeffrey Shaw examines the influence that these other philosophers had on Merton and Ellul as they formulated their own ideas on technology s impact on freedom Tracing the similarities and in some cases the differences between their critiques of technology and the idea that progress is always to be seen as something inherently good one finds that they bring a unique perspective to the debate and offer readers an alternative avenue for reflecting on the meaning of technology and its impact on our lives in the twenty first century **Technology and the Spirit** Ignacio L. Götz, 2001-08-30 Most contemporary

accounts of the role of technology in world culture are alarmist and at times condemn many uses of technology without much effort to get beyond the surface of this worldwide phenomenon. Technological innovations that might rightly be critiqued are taken as representative of the entire field of technology. On the other hand there are those including some scientists for whom technology and its uses pose no questions at all and who seem to delight in predictions of a future totally dominated by technology. They prey on the human delight in newness and innovation and on our readiness to be surprised by what may someday come to be. Gtz takes the position that so called technology problems are really our problems not the fault of technology. Technology is an integral part of what we are as human beings a significant aspect of our evolution. Gtz also advances the thesis that technology may be viewed from the perspective of the human capacity to grow and that when we do so we are in effect spiritualizing technology and rendering it more meaningful to ourselves. Gtz suggests several models that may be employed to achieve this spiritualization. This provocative analysis will be of interest to general readers as well as scholars students and researchers concerned with contemporary social and religious issues.

Technology and Cultural Values Peter D. Hershock, Marietta Stepaniants, Roger T. Ames, 2003-10-31 Recent history makes clear that the quantum leaps being made in technology are the leading edge of a groundswell of paradigm shifts taking place in science politics economics social institutions and the expression of cultural values. Indeed it is the simultaneity and interdependence of these changes occurring in every dimension of human experience and endeavor that makes the present so historically distinctive. The essays gathered here give voice to perspectives on the always improvised relationship between technology and cultural values from Africa the Americas Asia Australia Europe and the Pacific. Technology and Contemporary Life P.T. Durbin, 2012-12-06 Nearly everyone agrees that life has changed in our technological society whether the contrast is with earlier stages in Western culture or with non Western cultures. Modernization is just one of various terms that have been applied to the process by which we have arrived at the peculiar lifestyle typical of our age whatever the term for the process almost all analysts agree in finding technology to be one of its key ingredients. This is the judgment of critics of all sorts anthropologists historians literary figures sociologists theologians. Volume 4 in the Philosophy and Technology series brings the perspectives of philosophers to bear on the issue of characterizing contemporary life mainly in high technology societies. Some of the philosophers look at the issue directly. Others focus on work life or on the living arrangements that surround or

condition or offer refuge from work life in technological society Still others reflect on particular technologies especially biotechnology and computer technology that are increasingly affecting both work and family life There is also a paper on the nature of thinking in technological praxis along with two papers on whether it is appropriate to export this sort of thinking to Third World countries and another paper on the issue of responsibility in technology which would have fit better in volume 3 of the series entitled Technology and Responsibility 1987 Finally volume 4 closes with a broad ranging bibliography that takes work and technology as its focus

Questioning Technology with Jacques Ellul David W. Gill, Lisa

Richmond, 2025-10-07 Twenty first century technology is an ever expanding powerful force in virtually every aspect of human life and every corner of the globe So much of modern technology has resulted in positive improvements in communication work health and other domains Technology's promises and possibilities for the future are often glowing But it is one thing for technology to function as a tool serving human purpose and flourishing and quite another for it to be granted the position of unquestioned master All technologies deserve to be questioned What are their costs trade offs and potential or real negative impact And how do we create limits and controls for technological invasion when these would be wise and necessary Questioning Technology with Jacques Ellul addresses these questions in both the big picture and in their relevance to specific arenas such as art politics work and religion with voices from not just the academy but also the workplace and society

Community in the Digital Age Andrew Feenberg, Darin Barney, 2004-07-26 Is the Internet the key to a reinvigorated public life Or will it fragment society by enabling citizens to associate only with like minded others Online community has provided social researchers with insights into our evolving social life As suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more the Internet appears as a possible source for reconnection Are virtual communities real enough to support the kind of personal commitment and growth we associate with community life or are they fragile and ultimately unsatisfying substitutes for human interaction Community in the Digital Age features the latest most challenging work in an important and fast changing field providing a forum for some of the leading North American social scientists and philosophers concerned with the social and political implications of this new technology Their provocative arguments touch on all sides of the debate surrounding the Internet community and democracy
