Judith A. McGaw

Technology Power In The Early American:

Technology and Power in the Early American Cotton Industry James Montgomery, David J. Jeremy, 1990 Behind the original publication of Montgomery's *Practical Detail* 1840 lay the continuing concern about world markets international economic technological leadership Montgomery's achievement lay in the wealth reliability of the comparative data he assembled for the first time about the Am British cotton industries which were then the high tech of industrializing societies For the tech economics of production of the early 19th century cotton industries his work remains indispensable A mss has recently surfaced in which Montgomery recorded the changes he intended for the 2nd ed of his classic The vol is prefaced by a biog of Montgomery tracing his Scottish background his migration from Glasgow to New England in the 1830s an intro to the 2nd ed establishing its context Appended to the Montgomery text are the documents of the justitia controversy from the Boston newspapers of 1841 in which the merits relative costs of steam water power were debated Scholarly footnotes textual substantive are provided as appropriate Illus

[Technology in Early America](#) Brooke Hindle, 2012-12-01 This interpretative essay and extensive bibliography surveying the chronology and major characteristics of American technology before 1850 is the first available guide in this period to the rapidly developing field of the history of technology Originally published in 1966 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

Early American Technology Judith A. McGaw, 2014-01-01 This collection of original essays documents technology's centrality to the history of early America Unlike much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire tools the surveyor balancing economic and technical considerations while laying out a turnpike the woman of child bearing age employing herbal contraceptives and the neighbors of a polluted urban stream debating issues of property odor and health These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge Brooke Hindle's classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed A bibliographical essay and summary of Hindle's bibliographic findings conclude the volume The contributors are Judith A McGaw Robert C Post Susan E Klepp Michal McMahon Patrick W O Bannon Sarah F McMahon Donald C Jackson Robert B Gordon Carolyn C Cooper and Nina E Lerman

Science, Technology, and American Diplomacy; Commercial Nuclear Power in Europe United States. Congress. House. Foreign Affairs, 1972

The Struggle for Power in Colonial America, 1607-1776 William R. Nester, 2017-10-11 America's colonial era began and ended dramatically with the founding of the first enduring settlement at Jamestown on May 14 1607 and the Declaration of Independence in Philadelphia on July 4 1776 During those 169 years

conflicts were endemic and often overlapping among the colonists between the colonists and the original inhabitants between the colonists and other imperial European peoples and between the colonists and the mother country As conflicts were endemic so too were struggles for power This study reveals the reasons for stages and results of these conflicts The dynamic driving this history are two inseparable transformations as English subjects morphed into American citizens and the core American cultural values morphed from communitarianism and theocracy into individualism and humanism These developments in turn were shaped by the changing ways that the colonists governed made money waged war worshipped thought wrote and loved Extraordinary individuals led that metamorphosis explorers like John Smith and Daniel Boone visionaries like John Winthrop and Thomas Jefferson entrepreneurs like William Phips and John Hancock dissidents like Rogers Williams and Anne Hutchinson warriors like Miles Standish and Benjamin Church free spirits like Thomas Morton and William Byrd and creative writers like Anne Bradstreet and Robert Rogers Then there was that quintessential man of America s Enlightenment Benjamin Franklin And finally George Washington who more than anyone was responsible for winning American independence when and how it happened

Work, Class, and Power in the Borderlands of the Early American Pacific Evan Lampe, 2013-12-12 This book traces the history of working people who helped established the foundation of the American empire in the Pacific from its origins after the American Revolution to its coming of age in the 1840s and 1850s Beginning with the expeditions of the Columbia and the Lady Washington Lampe argues that the early American Pacific can best be considered through the interaction of four major locations connected through the networks of trade the merchant ship the Northwest Coast Honolulu and Canton Guangzhou In each of these locations the labors of a diverse population of working people was harnessed in the critical labors of empire building including the transportation of goods The central question that the consideration of working people in the Pacific economy during this period is Lampe argues the role of power applied on these laborers by an international capitalist class emerging alongside the Pacific commercial empires Lampe also finds that this power was not uncontested and emerged in response to the activities of labor Working people on the ship and in the port cities found ways to secure their piece of the profitable trade often through illicit means

Historical Dictionary of the Early American Republic Richard Buel Jr., Jeffers Lennox, 2016-12-20 The drafting and ratification of the federal constitution between 1787 and 1788 capped almost 30 years of revolutionary turmoil and warfare The supporters of the new constitution known at the time as Federalists looked to the new national government to secure the achievements of the Revolution But they shared the same doubts that the Anti federalists had voiced about whether the republican form of government could be made to work on a continental scale Nor was it a foregone conclusion that the new government would succeed in overcoming parochial interests to weld the separate states into a single nation During the next four decades the institutions and precedents governing the behavior of the national government took shape many of which are still operative today This second edition of *Historical Dictionary of the Early American Republic* contains a chronology an

introduction appendixes and an extensive bibliography The dictionary section has over 500 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about American history **China as an emerging regional and technology power** U.S.-China Economic and Security Review Commission,2004 **Law, Labor, and Ideology in the Early American Republic** Christopher L. Tomlins,1993-04-30 This book presents a fundamental reinterpretation of law and politics in America between 1790 and 1850 the crucial period of the Republic s early growth and its movement toward industrialism It is the most detailed study yet available of the intellectual and institutional processes that created the foundation categories framing all the basic legal relationships involving working people **American Studies** Jack Salzman,American Studies Association,1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988
