Teilhard de Chardin: an Analysis and Assessment David Gareth Jones, 1969

On the Origin of Consciousness Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration

Salvation in Henri de Lubac Eugene R. Schlesinger, 2023-07-15 This study provides a compelling account of the major works of Henri de Lubac one of the most influential theologians of the twentieth century and argues that soteriology provides a lens through which their inner unity can be discerned The writings of Henri de Lubac have left an indelible mark on Catholic theology preparing the ground for giving shape to and explaining the seminal event of twentieth century Catholicism the Second Vatican Council Like the Council itself though de Lubac remains a contested figure difficult to classify Salvation in Henri de Lubac presents an overview of de Lubac's major works in light of his own statements that a mystical vision animated them all De Lubac's mystical theology hinges upon a vision of

salvation understood as humanity's incorporation into the triune God through the cross and resurrection of the incarnate Christ. From his writings on the supernatural and theological epistemology to his treatments of the spiritual interpretation of Scripture, ecclesiology, sacramental theology, and the theology of history, the mystery of the cross looms large, gathering these disparate topics into one focal center while also allowing their distinct contours to remain. By attending to de Lubac's work in this light, Eugene R. Schlesinger brings important themes from French language scholarship into the English speaking conversation and clarifies the nature of de Lubac's *ressourcement*. Schlesinger claims that unless we understand de Lubac and his work in light of his own motivations and emphases, we risk distorting his contribution, reducing him to a proxy in the struggle for post-conciliar Catholic self-definition.

The Meaning of Teilhard de Chardin Alice Vallé Knight, 1974

A Companion to Jesuit Mysticism Robert Aleksander Maryks, 2017-03-06

In *A Companion to Jesuit Mysticism*, Robert A. Maryks provides thirteen unique essays discussing the Jesuit mystical tradition, a somewhat neglected aspect of Jesuit historiography that stretches as far back as the order's co-founder Ignatius of Loyola, his spiritual visions at Manresa, and ultimately the mystical perspective contained in his *Spiritual Exercises*. The volume's contributions on the most significant representatives of the Jesuit mystical tradition, from Baltasar Alvarez to Louis Lallemant to Hugo Makibi Enomiya Lassalle, aim to fill this lacuna in Jesuit historiography. Although intended primarily as a handbook for scholars seeking to further their own research in this area, the volume will undoubtedly be of interest to scholars and students of Jesuit studies more broadly.

A More Perfect Union Linda Sargent Wood, 2012-10-18

This book uncovers a holistic sensibility in post-World War II American culture that challenged Cold War logic and fed some of the century's most powerful social movements. This impulse is illustrated by focusing on Rachel Carson, Buckminster Fuller, Martin Luther King Jr., Abraham Maslow, Pierre Teilhard de Chardin, and the Esalen Institute.
