Structure And Development Of The Finnish Language:

The Structure and Development of the Finnish Language Lauri Hakulinen, 1961 **The Structure and Development of the Finnish Language. ... Translated by John Atkinson** Lauri HAKULINEN, John ATKINSON (Lecturer in Finnish in the University of Hull.), 1961 National Defense Language Development Program United States. Office of Education, 1963 **National Defense Language Development Program**, 1964 Standard Languages and Multilingualism in European History Matthias Hüning, Ulrike Vogl, Olivier Moliner, 2012-05-31 This volume explores the roots of Europe's struggle with multilingualism. It argues that over the centuries the pursuit of linguistic homogeneity has become a central aspect of the mindset of Europeans. In its extreme form it became manifest in the principle of one language one state one people. Consequently multilingualism came to be viewed as an undesirable aberration. The authors of this volume approach the relationship between standard languages and multilingualism from a historical cross-European perspective. They provide a comprehensive overview of the emergence of a standard language ideology and its intricate relationship with matters of ethnicity, territorial unity and social mobility. They explain for different European language areas in what ways the emergence of standard languages had an impact on multilingual policies and practices. Its comparative approach makes this volume an important resource for linguists, researchers from different philologies and social historians. **The Crosslinguistic Study of Language Acquisition** Dan Isaac Slobin, 2014-02-25 Continuing the tradition of this series which has become a standard reference work in language acquisition. Volume 4 contains chapters on three additional languages: language groups Finnish, Greek and Korean. The chapters are selective critical reviews rather than exhaustive summaries of the course of development of each language. Authors approach the language in question as a case study in a potential crosslinguistic typology of acquisitional problems, considering those data which contribute to issues of general theoretical concern in developmental psycholinguistics and linguistic theory. Each chapter therefore provides the following: Grammatical Sketch of Language: Brief grammatical sketch of the language or language group, presenting those linguistic facts which are relevant to the developmental analysis. Sources of Evidence: Summary of basic sources of evidence, characterizing methods of gathering data and listing key references. Overall Course of Development: Brief summary of the overall course of development in the language or language group, giving an idea of the general problems posed to the child in acquiring a language of this type, summarizing typical errors, domains of relatively error-free acquisition and the timing of acquisition. Areas of the grammar that show relatively precocious or delayed development in crosslinguistic perspective. Data: Specific developmental aspects of the language examined in depth, depending on each individual language and available acquisition data. Conclusions: An interpretive summary of theoretical points raised above, attending to general principles of language development and linguistic organization suggested by the study of a language of this type, plus comparisons with development of other languages. *The Oxford Handbook of Derivational Morphology* Rochelle Lieber, Pavol Štekauer, 2014 The Oxford Handbook
