Structure Of Inference:

Enriched Composition and Inference in the Argument Structure of Chinese Ren Zhang, 2005-10-20 As with many other languages Mandarin Chinese exhibits a rich variety of ways in expressing the arguments of the predicator in a sentence Unlike other languages such variation is typically devoid of any formal marking Previous attempts in explaining such phenomena usually focus on the syntax as an explanatory tool This book argues that a large majority of such argument structure phenomena are better accounted for by recourse to enriched representations in lexical semantics Drawing insights from conceptual semantics cognitive semantics Generative Lexicon construction grammar and formal syntax this book constitutes the first attempt at a comprehensive account of lexical semantic issues in Mandarin Chinese **Incomplete**

Information: Structure, Inference, Complexity Stephane P. Demri, Ewa Orłowska, 2013-04-18 The construction of any broadly understood theory of information or information processing system involves two major methodological processes 1 abstraction and analysis 2 reasoning and computing This monograph is a realisation of these two processes in relation to the study of incompleteness of information The paradigm we are working with is inspired by a rough set approach to data analysis the formalisms we develop enable the use of a non invasive data representation This means that the only information which is and must be used in the process of analysis is the actual information that is to be analysed we do not require any additional sources of information An abstraction is formed in the process of conception design and development of structures Then analysis leads to a selection of a class of structures In this book we delineate a class of informational structures that enable us to represent both numerical and non numerical information and we analyse various manifestations of its incompleteness We discuss several general types of incompleteness of information which are grounded in a rough set style view of imprecision and uncertainty Manifestations of these types of incompleteness in information systems are investigated
