Structure and Flow in Surfactant Solutions Craig A. Herb, Robert K. Prud'homme, American Chemical Society. Division of Colloid and Surface Chemistry, American Chemical Society. Meeting, 1994-01-01 Covers the rheology of surfactant solutions from theoretical models to practical industrial applications of these systems Discusses a wide range of surfactant structures including entangled worm like micelles spontaneous vesicle systems with yield stresses lamellar hexagonal and cubic liquid crystalline phases and polymer micelle complexes Includes coverage of cryo TEM SANS SAXS light scattering time resolved fluorescence quenching NMR rheo optical techniques and optical probe diffusion methods used to study the link between structure and rheology Structure-Performance Relationships in Surfactants Kunio Esumi, Minoru Ueno, 2003-03-18 In response to intensifying interest on surfactant research brought on by recent innovation Structure Performance Relationships in Surfactants Second Edition examines novel developments in our understanding of the properties and performance of surfactants at air liquid liquid liquid and solid liquid interfaces highlighting seven new chapters and carefully updated material to reflect current trends This edition presents new material on the adsorption of vesicle forming surfactants at the air water interface fluorinated surfactants having two hydrophobic chains surface active properties of telomer type surfactants having several hydrocarbon chains and the association behavior of amphiphilic dendritic polymers among many other topics Understanding Drug Release and Absorption Mechanisms Mario Grassi, Gabriele Grassi, Romano Lapasin, Italo Colombo, 2006-12-26 Demand for better reliability from drug delivery systems has caused designers and researchers to move away from trial and error approaches and toward model based methods of product development Developing such models requires cross disciplinary physical mathematical and physiological knowledge Combining these areas under a single cover Under **Sugar-Based Surfactants** Cristóbal Carnero Ruiz, 2008-12-09 Touted as the new darling of the chemical industry alkyl polyglycosides are gaining in popularity due to the fact that they are readily biodegradable low toxic and made from renewable resources Sugar Based Surfactants compiles the most recent and relevant aspects of sugar based surfactants including self association phase behavior and interf Structure of Turbulence and Drag Reduction Albert Gyr, 2012-12-06 In 1976 a similar titled IUTAM Symposium Structure of Turbulence and Drag Reduction was held in Washington However the progress made during the last thirteen years as well as the much promising current research desired a second one this year In Washington drag reduction by additives and by direct manipulation of the walls compliant walls and heated surfaces were discussed In the meantime it became evident that drag reduction also occurs when turbulence is influenced by geometrical means e g by influencing the pressure distribution by the shape of the body airfoils or by the introduction of streamwise perturbances on a body riblets In the recent years turbulence research has seen increasing attention being focused on the investigation of coherent structures mainly in Newtonian fluids We all know that these structures are a significant feature of turbulent flows playing an important role in the energy balance in such flows

However their place in turbulence theories as well as the factors influencing their development are still poorly understood. Consequently the investigation of phenomena in which the properties of coherent structures are altered provides a promising means of improving our understanding of turbulent flows in general.
