Structuring Politics Historical Institutionalism In Comparative Analysis:

Structuring Politics Sven Steinmo, Kathleen Thelen, Frank Longstreth, 1992-09-25 These essays demonstrate how the historical institutional approach to the study of politics reveals the nature of institutional change and its effect on policy making

Structuring Politics ,2002 **Structuring Politics** Frank Longstreth, Sven Steinmo, Kathleen Ann Thelen, 1998

The Oxford Handbook of Historical Institutionalism Orfeo Fioretos, Tulia G. Falletti, Adam Sheingate, 2016-03-17 The Oxford Handbook of Historical Institutionalism offers an authoritative and accessible state of the art analysis of the historical institutionalism research tradition in Political Science Devoted to the study of how temporal processes and events influence the origin and transformation of institutions that govern political and economic relations historical institutionalism has grown considerably in the last two decades With its attention to past present and potential future contributions to the research tradition the volume represents an essential reference point for those interested in historical institutionalism Written in accessible style by leading scholars thirty eight chapters detail the contributions of historical institutionalism to an expanding array of topics in the study of comparative American European and international politics

The National Origins of Policy Ideas John L. Campbell, Ove K. Pedersen, 2014-04-27 In politics ideas matter They provide the foundation for economic policymaking which in turn shapes what is possible in domestic and international politics Yet until now little attention has been paid to how these ideas are produced and disseminated and how this process varies between countries The National Origins of Policy Ideas provides the first comparative analysis of how knowledge regimes communities of policy research organizations like think tanks political party foundations ad hoc commissions and state research offices and the institutions that govern them generate ideas and communicate them to policymakers John Campbell and Ove Pedersen examine how knowledge regimes are organized operate and have changed over the last thirty years in the United States France Germany and Denmark They show how there are persistent national differences in how policy ideas are produced Some countries do so in contentious politically partisan ways while others are cooperative and consensus oriented They find that while knowledge regimes have adopted some common practices since the 1970s tendencies toward convergence have been limited and outcomes have been heavily shaped by national contexts Drawing on extensive interviews with top officials at leading policy research organizations this book demonstrates why knowledge regimes are as important to capitalism as the state and the firm and sheds new light on debates about the effects of globalization the rise of neoliberalism and the orientation of comparative political economy in political science and sociology

Democracy and Institutions Markus M. L. Crepaz, Thomas Albert Koelble, David Wilsford, 2010-06-08 Institutions are the channels of political power This volume explores Arend Lijphart's life work the design of political institutions All the contributors to this volume share the fundamental insight that the design of political institutions matters in how democracies work The essays in this volume offer both theoretical insights into the context and implications of Lijphart's ideas and

empirical exploration of the ideas Two chapters by Thomas Koelble and Andrew Reynolds examine and apply Lijphart's insights to South Africa while another study by Jack Nagel explores the fascinating institutional changes taking place in New Zealand Essays by Bernard Grofman and Rein Taagepera examine Lijphart's work from a theoretical perspective and place Lijphart's work in the wider neo-institutionalist school of thought Milton Esman applies the principle of power sharing to mobilized communities not only in democratic societies but also to those which are governed by authoritarian rule Bingham Powell offers an empirical approach to the crucial question of the connection between political institutions and responsiveness of policy makers Markus M L Crepaz and Vicki Birchfield argue that in this age of globalization countries with consensual political institutions will not only systematically refract the pressures of globalization but will be able to absorb the domestic consequences of globalization more successfully than majoritarian countries Finally Arend Lijphart responds to the arguments made in these essays extending and adding novel concepts and insights to his conceptual framework The book will be of interest to political scientists lawyers and sociologists who study institutions the impact of electoral systems and constitutional design In addition those who study globalization will be attracted by the relevance of domestic political institutions and their refractory effects as the tides of globalization wash against the domestic shores Markus M L Crepaz is Associate Professor of Political Science University of Georgia Thomas A Koelble is Associate Professor of Political Science University of Miami David Wilsford is President and Professor the Institute for American Universities

Ideas and International Political Change Jeffrey T. Checkel, 1997-01-01 The end of the Cold War dramatically and unexpectedly transformed international politics toward the end of the 20th century At the heart of this change was the struggle over new and old ideas

International Trade and Political Institutions Fiona McGillivray, 2001-01-01 In *International Trade and Political Institutions* four leading young scholars of comparative and international political economy come together to analyse aspects of trade policy from the late eighteenth to the early twentieth centuries Combining theoretical sophistication with empirical depth they provide cogent arguments about the interaction of interests institutions and ideas in a period of crucial importance to those who would like to understand the sources and implications of global economic integration This exciting volume will be of great interest for scholars concerned with international trade political economy and the history of the nineteenth century world economy Jeffrey A Frieden Harvard University US This fascinating volume should be read by political scientists economists and historians interested in the political formation of trade policy The papers consider a rich set of historical examples and never fail to be provocative and interesting Douglas Irwin Dartmouth College US It is a widely held view that politics plays an important role in determining international trade policy Defining precisely why and how politics matters is more difficult Despite the benefits of trade few nations have wholeheartedly adopted free trade policies and when they do so it is by managing trade through international institutions and multi or bilateral trade treaties *International Trade and Political Institutions* broadens the public choice theory of trade politics to allow for the study of ideas

and institutions within a longer time horizon The authors use theoretically rigorous historical analysis of international political economy and four important case studies to help untangle the role of ideology institutions and interests This illuminating book connects the fields of economics political economy and history to shed new light on trade theory

Administrative Traditions B. Guy Peters, 2021-02-02 Contemporary public administration reflects its historical roots as well as contemporary ideas about how the public bureaucracy should be organized and function This book argues that there are administrative traditions that have their roots centuries ago but continue to influence administrative behaviour Further within Western Europe North America and the Antipodes there are four distinctive administrative traditions Anglo American Napoleonic Germanic and Scandinavian These are not the only traditions however and the book also explores administrative traditions in Central and Eastern Europe Latin America Asia and the Islamic world In addition the book contains a discussion of how administrative traditions of the colonial powers influenced contemporary administration in Africa and how they continue to interact with traditional forms of governance These discussions of tradition and persistence are also discussed in light of the numerous attempts to reform and change public administration Some administrative traditions have been more capable than others of resisting attempts at reform especially those associated with the New Public Management

The Challenge of Cultural Pluralism Stephen Brooks, 2002-10-30 Many believe that we are passing through a period during which due largely to globalization s challenge to the idea and sovereignty of nation states there is now the intellectual and political space for the construction of new models of citizenship involving new relations between individuals and their governments These new relations may be mediated through individuals membership in communities that are recognized within states In various ways the resurgence of ethnic nationalism the rise of multiculturalism the ideas associated with communitarianism and the apparent erosion of national sovereignty have all contributed to the creation of this interest in new ways of conceptualizing citizenship and carrying out the tasks of governance Brooks and his colleagues examine various aspects of the challenge of cultural pluralism Together they cover a wide range of national cases theoretical issues and empirical research The collection is intended for all scholars students and researchers who have an interest in cultural pluralism consociationalism and inter community relations in societies divided by language ethnicity and culture
