Struggle For The Future:

The Struggle for a Human Future Jeremy Naydler, 2020-04-16 With its wireless networks encompassing the globe the Digital Revolution is altering the very fabric of our lives with alarming rapidity New technologies are bringing about an ever closer union between human beings and machines whilst at the same time transforming our planet into an increasingly hybrid cyber physical world The current rollout of fifth generation wireless communication networks or 5G is central to the project to create a global electronic ecosystem in which we will be obliged to live This will provide the basis for an all pervasive Internet of Things and the widespread integration of Augmented and Virtual Reality into human experience But what genuine human needs will this serve Does the planet really need to be made smart Will our health and that of other living creatures really be unaffected by exposure to escalating levels of electromagnetic radiation As we enter a new era of extreme technology driven by a momentum that seems beyond the constraint of any spiritual or moral consideration both human beings and nature face an unprecedented challenge Jeremy Naydler argues that it is a challenge that can only be met through a re affirmation of essential human values and the recovery of a sacred view of nature From this grounding we can work towards a truly human future that rather than creating yet more pollution and toxicity will bring blessing to the natural world to which we belong Jeremy Naydler has become in my judgement one of the most interesting and original living writers in Britain Professor Bruce G Charlton author of *Addicted to Distraction* *The Future of Theology* Miroslav Volf, Carmen Krieg, Thomas Kucharz, 1996 This is a print on demand book and is therefore non returnable Perhaps no other theologian of the second half of this century has shaped theology so profoundly as has J rgen Moltmann He appeared on the world theological scene with his *Theology of Hope* 1964 and took most of its capitals by storm His subsequent works have kept him at the forefront of the modern theological enterprise and the power of his vision and the originality of his method have inspired a host of new theologians In terms of fecundity Moltmann s opus remains unmatched among his generation of theologians More than 130 dissertations written so far on his thought most of them in the past decade testify eloquently to its continued attractiveness In honor of Moltmann s 70th birthday twenty six of the world s leading theologians his friends colleagues interlocutors and former students have contributed to this volume on the future of theology Moltmann himself has always sought to be both contemporary and future oriented his theology can be viewed as an exercise not only from the perspective of God s future but also toward a new human future Thus a book on the future of theology takes up an aspect of his theme and his concern Yet this volume also makes a significant contribution to theology in its own right seeking as it does to address the present crisis of theology As Miroslav Volf writes in his introduction On the threshold of the third millennium the presumed queen of sciences has grown old and feeble unable to see that what she thinks is her throne is just an ordinary chair uncertain about what her territories are and confused about how to rule in the realms she thinks are hers seeking advice from a quarrelsome chorus of counselors each of whom thinks himself the king and ending up with a divided even

schizophrenic mind The essays in this volume attempt to revitalize theology as it confronts a difficult future Despite the formidable obstacles that threaten the very survival of theology in the next century religious and cultural plurality the marginalization of theology in public discourse increasing abstraction in the practice of theology pressing issues of gender race poverty and ecology the seemingly archaic voice of theology in post Christian societies the contributors to this volume all believe in the future of theology as a vibrant discipline The Future of Theology is organized in three parts Challenges deals with the external or internal problems that theology is facing Perspectives offers proposals on how to meet the challenges Themes concentrates on various issues that need special attention today Together these essays succeed in setting the theological agenda for the future of theology and thereby serve as a fitting tribute to this volume s esteemed honoree Contributors Stanley Hauerwas Elisabeth Moltmann-Wendel John B Cobb Jr James H Cone D Lyle Dabney Ingolf U Dalferth Gustavo Guti rrez Douglas John Hall Ellen T Charry M Douglas Meeks Johann Baptist Metz Konrad Raiser Wolfhart Pannenberg Paul Ricoeur John Howard Yoder Dietrich Ritschl Doroth e S lle Jon Sobrino Elsa Tamez Geoffrey Wainwright Rosemary Radford Ruether Miroslav Volf Michael Welker Nicholas Wolterstorff Catherine Keller Huns K ng *The Struggle for a Multilingual Future* Christina P. Davis (Anthropologist), 2020 In *The Struggle for a Multilingual Future* Christina Davis examines the tension between ethnic conflict and multilingual education policy in the linguistic and social practices of Sri Lankan minority youth Facing a legacy of post independence language and education policies that were among the complex causes of the Sri Lankan civil war 1983-2009 the government has recently sought to promote interethnic integration through trilingual language policies in Sinhala Tamil and English in state schools Integrating ethnographic and linguistic research in and around two schools during the last phase of the war Davis s research shows how despite the intention of the reforms practices on the ground reinforce language based models of ethnicity and sustain ethnic divisions and power inequalities By engaging with the actual experiences of Tamil and Muslim youth Davis demonstrates the difficulties of using language policy to ameliorate ethnic conflict if it does not also address how that conflict is produced and reproduced in everyday talk

The Jobless Future Stanley Aronowitz, 1994 The Jobless Future challenges beliefs in the utopian promise of a knowledge based high technology economy Reviewing a vast body of encouraging literature about the postindustrial age Aronowitz and DiFazio conclude that neither theory history nor contemporary evidence warrants optimism about a technological economic order Instead they demonstrate the shift toward a massive displacement of employees at all levels and a large scale degradation of the labor force As they clearly chart a major change in the nature scope and amount of paid work the authors suggest that notions of justice and the good life based on full employment must change radically as well They close by proposing alternatives to our dying job culture that might help us sustain ourselves and our well being in a science and technology based economic future One alternative discussed is reducing the workday to fewer hours without reducing pay

Senses of the Future Gerard Delanty, 2024-03-04 The future has become a problem for the present Almost every critical issue is now understood and experienced through the prism of the future since this is the primary focus for the playing out of crises Senses of the Future offers a wide ranging discussion of theories of the future It covers the main ideas of the future in modern thought and explores how we should view the future today in light of a plurality of very different and conflicting visions The key contribution of this book is to bring together the different approaches with an account that is grounded in sociological and philosophical analysis as opposed to visions of the future that are inspired by extreme visions of catastrophe or approaches that see the future as only the continuation of the present Given a revival of apocalyptic visions of the end times and dystopian views of the future of human societies there is urgent need for a new approach on how we should imagine the future The author explores the future as a field of tensions that is revealed in narratives utopian desires hope imaginaries and social struggles concerning the potential possibilities of the present the future does not just arrive it has to be fought for This book is an important contribution to a critical sociology of the future It is both a work of reconstruction and critique grounded in a historical and philosophical hermeneutics of the future
