Student Approaches To Learning And Studying:

Student Approaches to Learning and Studying John Burville Biggs,1987 This manual describes the theory behind the Study Process Questionnaire SPQ and explains what the subscale and scale scores mean The SPQ is a 42 item self report questionnaire used in Australia to assess the extent to which a tertiary student at a college or university endorses different approaches to learning and the motives and strategies comprising those approaches The SPQ yields scores on three basic motives for learning and three learning strategies and on the approaches to learning that are formed by these motives and strategies The three important approaches to learning are categorized as 1 surface meeting the minimum requirements 2 deep an intrinsic interest in what is learned and 3 achieving enhancing ego and self esteem through the competition for grades The SPQ operationalizes these approaches and their constituent motives and strategies in terms of scale and subscale profiles representing an individual s general orientation toward learning Directions for administering scoring and interpreting scores are given with suggestions about how they may be used by teachers and counselors Statistical information about reliability and validity four data tables five figures and 16 tables of norms are provided Norms are given separately for males and females for colleges and universities and for faculties of arts education and science The SPQ is enclosed SLD

Student Approaches to Learning and Studying John Burville Biggs,1987 This book formulates a theory of student learning which together with the instruments deriving from it has implications for teaching practice at the secondary and tertiary level The norms were established on two secondary and two tertiary large national samples

PISA Learners for Life: Student Approaches to Learning Results from PISA 2000 OECD,2003-09-29 The report offers policy makers a fine grained analysis of which particular learner characteristics are prevalent in different countries It also identifies differences between the approaches of various groups including male and female students and those from more and less advantaged backgrounds

Understanding Student Learning (Routledge Revivals) Noel Entwistle,Paul Ramsden,2015-08-20 First published in 1983 Understanding Student Learning provides an in depth analysis of students learning methods in higher education at the time It examines the extent to which these learning methods reflected the teaching assessment and individual personalities of the students involved The book contains interviews with students experiments and statistical analyses of survey data in order to identify successes and difficulties in student learning and the culmination of these techniques is a clearer insight into the process of student learning

Learning Patterns in Higher Education David Gijbels,Vincent Donche,John T. E. Richardson,Jan D. Vermunt,2013-09-11 Learning Patterns in Higher Education brings together a cutting edge international team of contributors to critically review our current understanding of how students and adults learn how differences and changes in the way students learn can be measured in a valid and reliable way and how the quality of student learning may be enhanced There is substantial evidence that students in higher education have a characteristic way of learning sometimes

called their learning orientation Biggs 1988 learning style Evans et al 2010 or learning pattern Vermunt and Vermetten 2004 However recent research in the field of student learning has resulted in multi faceted and sometimes contradictory results which may reflect conceptual differences and differences in measurement of student learning in each of the studies This book deals with the need for further clarification of how students learn in higher education in the 21st century and to what extent the measurements often used in learning pattern studies are still up to date or can be advanced with present methodological and statistical insights to capture the most important differences and changes in student learning The contributions in the book are organized in two parts a first conceptual and psychological part in which the dimensions of student learning in the 21st century are discussed and a second empirical part in which questions related to how students learning can be measured and how it develops are considered Areas covered include Cultural influences on learning patterns Predicting learning outcomes Student centred learning environments and self directed learning Mathematics learning This indispensable book covers multiple conceptual perspectives on how learning patterns can be described and effects and developments can be measured and will not only be helpful for learning researchers as such but also for educational researchers from the broad domain of educational psychology motivation psychology and instructional sciences who are interested in student motivation self regulated learning effectiveness of innovative learning environments as well as assessment and evaluation of student characteristics and learning process variables *The University of Learning* John Bowden, Ference Marton, 2003-12-18 Universities are rarely structured to facilitate learning and when they are it is often done so in a limited way This book looks at the theory and practice of learning and how universities can improve their quality and competence It tackles the past failure of the quality and competence movements and advocates a move towards Universities of Learning The authors advocate an integration of elements that are often dealt with separately theory and practice teaching and research and the levels of institution and individual and handle these dimensions of integration in conjunction with each other This new paperback edition will be essential reading for all those who are concerned with improving learning in higher education It includes an updated preface that takes account of developments since the publication of the hardback edition *Study, Power And The University* Mann, Sarah, 2008-11-01 This book highlights the effects of power within the higher educational process and argues that in order to understand the student experience we have to take seriously the institution as a context for learning *Student Approaches to Learning and Studying* ,1978 Resources in Education ,1990
