

The background of the slide features a vibrant, abstract image of jellyfish. The top half has a blue and green gradient, while the bottom half is dominated by a large, colorful jellyfish with a yellow and orange bell and a red, translucent, and wavy mantle. The overall effect is a soft, ethereal glow.

Student Directed Learning Teaching Self Determination Skills:

Student-directed Learning Martin Agran,1997 Addressing a topic that has received much recent professional interest Student Directed Learning Teaching Self Determination Skills provides clear step by step instruction on how to teach students with disabilities to manage and assume responsibility for their own learning Up to date and comprehensive this book is one of the first to address the programmatic shift in special education from dependence to independence The authors go beyond definitions and provide a detailed and systematic means of teaching self management and self determination skills that are essential when teaching people with disabilities to manage and chart their own behavior

Student-Directed Learning Martin Agran,1996-12 This practical text written by Martin Agran with original chapters contributed by a number of experts in the field provides an in depth focus on strategies classroom teachers can use to help students with mild to severe disabilities learn how to manage their own behavior in the classroom Agrans approach is based on current research that shows that self management can be as if not more effective as teacher directed instruction because it empowers students by allowing them to be actively involved in their own instruction and educational decision making At the same time it can reduce hostility and conflict between teacher and child Self determination or student directed learning is one of the major paradigmatic shifts in special education and this book is one of the first to advance this change

Self-instruction Pedagogy Dennis E. Mithaug,2007 This book describes a method of teaching that fosters autonomous learning in all students including students with disabilities The pedagogy is based on decades of research on strategy instruction as well as on a theory of learning that claims these four conditions promote self determined learning in all learners 1 opportunities to choose expectations for gaining something from a learning challenge 2 strategies that regulate responses to meet those expectations 3 comparisons between results and expectations that provoke additional adjustment in expectations and responses and 4 persistent engagement and adjustment until results match expectations The pedagogy of self instruction described in this book anchors these conditions in everyday instruction so students can learn by adjusting to their own expectations Chapter 1 compares this approach to the teacher directed methods of direct instruction that require teachers to set expectations for students control how students respond to them evaluate the outcomes they produce and then prescribe adjustments students must make to improve Chapter 2 provides evidence that too much of special education instruction reflects this teacher directed approach and as a consequence discourages students from learning how to learn on their own Chapters 3 6 identify four ways to shift learning control from teachers to students and Chapters 7 and 8 identify the obstacles to achieving this instructional shift in special education The appendices of the book provide a bibliography of research on self instruction and direct instruction pedagogies and a validated self assessment that can evaluate the directedness of your teaching

Clinician's Handbook of Child Behavioral Assessment Michel Hersen,2011-04-28 Given the vast amount of research related to behavioral assessment it is difficult for clinicians to keep abreast of new developments In recent years there have

been advances in assessment case conceptualization treatment planning treatment strategies for specific disorders and considerations of new ethical and legal issues Keeping track of advances requires monitoring diverse resources limited to specific disorders many of which give short shrift to child assessment overlooking developmental considerations Much of the existing literature is either theoretical research in focus or clinical in nature Nowhere are the various aspects of child behavioral assessment placed in a comprehensive research clinical context nor is there much integration as to conceptualization and treatment planning The Clinician s Handbook of Child Behavioral Assessment was created to fill this gap summarizing critical information for child behavioral assessment in a single source The Clinician s Handbook of Child Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes child abuse assessment classroom assessment behavioral neuropsychology academic skills problems and ethical legal issues Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective child behavioral assessment

Self-determined Learning Theory Deirdre K. Mithaug, Martin Agran, James E. Martin, Michael L. Wehmeyer, 2002-12-18 This volume brings together four semi autonomous bodies of research choice self determination self regulation and self management to form a new theory of self engaged learning entitled Self Determined Learning Theory This theory explains why and how students self engage It identifies the factors that give students the sense of control over their learning that is needed for sustained adaptive and ultimately successful learning It begins by describing the characteristics of disengaged learners then describes and illustrates self determined learning theory within both normal and special populations It then examines the theory s predictive value across several special population contexts and then concludes with a critique of the theory s credibility and worth Divided into three sections theory construction theory verification and theory evaluation this volume is organized using the four steps of a previous book Learning to Theorize A Four Step Strategy Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing Step 3 evaluates the credibility and worth of the explanation constructed in Step 2 Step 4 adjusts existing beliefs so they are consistent with the new theory Although aimed primarily at leaders in special education it should also appeal to researchers and scholars in psychology educational psychology and school psychology who are interested in the applications of self regulated learning theory in this case to

special populations Promoting Self-determination in Students with Developmental Disabilities Michael L. Wehmeyer, 2007-04-14 Affordable and complete this book provides evidence based strategies to promote self determination and is the first volume to combine both theory and practice in this area Because self determination is a key issue for students with moderate and severe disabilities this is an ideal resource for middle and secondary special educators school psychologists and other school practitioners

Autonomy, Agency, and Identity in Teaching and Learning English as a Foreign Language (Mark) Feng Teng, 2018-06-01 This book discusses the importance of autonomy agency and identity in teaching and learning English as a foreign language all of which are central themes in the educational domain By linking theory with practice to appeal to researchers as well as classroom practitioners it provides an overview of the theoretical constructs of autonomy agency and identity along with empirical studies that explore these constructs through life stories as told by English teachers and students Key features include New ideas to inspire professionals involved in foreign language education Up to date information to showcase for English language educators how autonomy agency and identity can be conceptualized across various institutional sociocultural and political contexts A concise yet comprehensive review of the theoretical and practical issues characterizing English foreign language education today

Teaching Self-determination to Students with Disabilities Michael L. Wehmeyer, Martin Agran, Carolyn Hughes, 1998 This teacher friendly resource offers a variety of instructional strategies for teaching students the specific skills they need for more satisfactory self directed lives skills like assertiveness goal setting self advocacy self management decision making problem solving self awareness Practicing and prospective educators will find objectives and key terms at the beginning of each chapter and vignettes and case studies sprinkled throughout making the book an ideal text This is an invaluable resource for meeting IDEA 1997 requirements while motivating high school students with disabilities to prepare for successful transitions to adulthood

The Road Ahead Dawn Hunter, 2013-12-11 Successful transition from school to adult life has always been difficult for people with disabilities especially in the area of employment The vast majority of people with disabilities are either unemployed or underemployed with low wages and few benefits and many governments are struggling to find a way of providing employment and benefits to people with disabilities without creating disincentives to work This book provides strategies and ideas for improving the lives of people with disabilities exploring new ways of enabling a successful transition to an integrated adult working life by providing effective instruction and support Following an introduction which outlines the importance of transition services and meaningful outcomes topics covered in the remaining chapters include Person Centered Transition Planning Enhancing Competence and Independence Employment Assessment and Career Development Collaboration between Agencies for a Seamless Transition Independent Living and Supported Living and Community Functioning Skills The book will be of interest to all those who work with transition age students as well as those who work with adults with disabilities and want to enable them to have the best life possible To paraphrase Helen Keller people with

disabilities not only need to be given lives they need to be given lives worth living *THEORY IN SELF-DETERMINATION*
Michael L. Wehmeyer, Brian H. Abery, Dennis E. Mithaug, Roger J. Stancliffe, 2003-01-01 This text provides a comprehensive overview of three theoretical perspectives proposed during the past decade addressing the self determination construct as it applies to the field of special education The three models were selected primarily because they have focused on defining and categorizing self determination for all students with disabilities including students with mental retardation and other cognitive disabilities These models are intended to provide students and practitioners a solid grounding in self determination theory All models have been evaluated among students with cognitive disabilities but are applicable to all students with or without disabilities The authors research each model and have applied their own theoretical framework to special education ensuring that interventions to promote skills like problem solving goal setting decision making and self advocacy are in place for all students By reading this text the reader will gain a solid theoretically based foundation in understanding the self determination construct which ultimately supports the development of instructional interventions that enable students with disabilities to become self determined It will be useful as a text in upper undergraduate and graduate courses in special education psychology social work welfare general education vocational rehabilitation and disability studies
