Technological Change and the Transformation of America Steven E. Goldberg, Charles R. Strain, 1987 This collection of original essays examines modern technology in light of American intellectual and social history Goldberg and Strain have arranged the essays in four sections each treating a dimension of American culture consciousness work politics and community The book is distinguished not only by the breadth of its perspective but also by the quality of its contributors notably Christopher Lasch Leo Marx John Kasson Albert Borgmann Irving Bluestone and Senator Charles McC Mathias The essays address a series of hard choices mass production or flexible specialization computer surveillance as the protection or violation of human rights economic mobility or cohesive community progress as technological expansion or as the fulfillment of political ideals This volume shows how the choices made in the development of technology both historically and today spring from cultural traditions and beliefs

Law in an Era of Smart Technology Susan Brenner, 2007-12-31 Should law be technologically neutral or should it evolve as human relationships with technology become more advanced In *Law in an Era of Smart Technology* Susan Brenner analyzes the complex and evolving interactions between law and technology and provides a thorough and detailed account of the law in technology at the beginning of the 21st century Brenner draws upon recent technological advances evaluating how developing technologies may alter how humans interact with each other and with their environment She analyzes the development of technology as shifting from one of use to one of interaction and argues that this interchange needs us to reconceptualize our approach to legal rules which were originally designed to prevent the misuse of older technologies As technologies continue to develop over the next several decades Brenner argues that the laws directed between human and technological relationships should remain neutral She explains how older technologies rely on human implementation but new smart technology will be completely automated This will eventually lead to as she explains the ultimate progression in our relationship with technology the fusion of human physiology and technology *Law in an Era of Smart Technology* provides a detailed historically grounded explanation as to why our traditional relationship with technology is evolving and why a corresponding shift in the law is imminent and necessary

Transforming America's Military , **Most Wonderful Machine** Judith A. McGaw, 2019-01-15 On a visit to a Berkshire paper mill the narrator of Herman Melville's *The Tartarus of Maids* views the wonderful papermaking machine with awe and calls it a miracle of inscrutable intricacy Manifesting in their factories and towns such nineteenth century fascination with machinery paper mill owners and workers made an industrial revolution in Berkshire County Massachusetts This book examines their experiences from the era of craft production through several generations of sustained technological change to answer two major questions What accounts for the widespread and rapid adoption of machines in nineteenth century America And how did the new technology help to transform America socially and culturally Rejecting technological determinism Judith McGaw effectively integrates labor business social and women's history with technological history to

bring to life the human decisions that made mechanization possible In compelling detail the author offers new explanations of how change in the craft era paved the way for industrialization and how paternalism worked in small scale industry She also provides a thoughtful discussion of the interaction between evangelical culture and the emerging industrial order and a close analysis of how nineteenth century gender distinctions fostered mechanization Judith A McGaw is Assistant Professor of History of Technology at the University of Pennsylvania Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Dynamics of Technological Change Girifalco,2012-12-06 Technology is not an end in itself but a way of satisfying human wants It shows us how to solve the age old economic problem of surviving and prospering in a hard world But to optimize the benefits of technological advance requires an understanding of how it happens The purpose of this book is to provide some of that understanding The subject is so enormous and so intertwined with every human activity that a small selection of it and that from a special viewpoint is inevitable The selection of subject matter has been of course conditioned by what interests me and is somewhat heterogeneous However it is connected by two major themes The first is that it emphasizes the dynamic nature of technology in the sense that it must be approached as a process evolving in time that can often be described in quantitative terms The second is that I have chosen topics that I believe are essential for a strategic sense of how to plan for execute and respond to technological change These two themes complement each other because the strategic sense requires an appreciation of the dynamics and the dynamics naturally lead to a consideration of how to deal with technology so that it can be used to achieve human objectives The unifying thought behind the book is that
