Technologies Of Landscape From Reaping To Recycling:

Technologies of Landscape David E. Nye, 1999 Interdisciplinary essays on the relationship between technology and landscape *Landscape Theory* Rachel DeLue, James Elkins, 2010-10-28 Artistic representations of landscape are studied widely in areas ranging from art history to geography to sociology This book brings together more than fifty scholars from many disciplines to establish new ways of thinking about landscape in art **Landscape in American Guides and View Books** Herbert Gottfried, 2013 Landscape in American Guides and View Books Visual History of Touring and Travel is vested in the American relationship to landscape and the role guidebooks and view books played in touring and travel experiences including immigration Early in the history of the republic the relationship to landscape turns visual that is landscapes inspire artistic responses in the form of written descriptions and visual representations The predominant element is the scene From the 1820s on scenic thinking within an emerging industrial economy characterizes a major cultural and social development As immigration increases within the country and from abroad publishers and trade groups create souvenir guidebooks and view books to facilitate the movement of people and to encourage economic expansion and tourism Guide and view book analysis centers on pictures of landscape transformations and includes the cultural basis of scenes changing from pastoral and picturesque expressions to the documentation of managed views The general acceptance of managed views as replacements for romantic ones illustrates a commitment to landscapes that denote utility and the influence of commercial and industrial urban centers on American life Guidebook and view book imagery composed of durable schemas promotes visual thinking across social classes and time The primary medium for souvenirs is the photograph which printing methods like photolithography transform into printed products The visual history of touring and travel is part of America's first visual culture as well as the social formation of landscape the emergence of a collective vision among souvenir producers and consumers and the role visual information plays in landscape commentary which is the literary context for printed souvenirs

Conflicted American Landscapes David E. Nye, 2021-04-27 How conflicting ideas of nature threaten to fracture America's identity Amber waves of grain purple mountain majesties American invest much of their national identity in sites of natural beauty And yet American lands today are torn by conflicts over science religion identity and politics Creationists believe that the Biblical flood carved landscapes less than 10 000 years ago environmentalists protest pipelines Western states argue that the federal government's land policies throttle free enterprise Native Americans demand protection for sacred sites In this book David Nye looks at Americans irreconcilably conflicting ideas about nature A landscape is conflicted when different groups have different uses for the same location for example when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture Some landscapes are so degraded from careless use that they become toxic anti landscapes Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today's environmental

crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America s contradictory conceptions of nature are at the heart of a broken national consensus

Histories of Technology, the Environment and Modern Britain Jon Agar, Jacob Ward, 2018-04-09 Histories of Technology the Environment and Modern Britain brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years It combines for the first time two perspectives with much to say about Britain since the industrial revolution the history of technology and environmental history Technologies are modified environments just as nature is to varying extents engineered Furthermore technologies and our living and non living environment are both predominant material forms of organisation and self organisation that surround and make us Both have changed over time in intersecting ways Technologies discussed in the collection include bulldozers submarine cables automobiles flood barriers medical devices museum displays and biotechnologies Environments investigated include bogs cities farms places of natural beauty and pollution land and sea The book explores this diversity but also offers an integrated framework for understanding these intersections The Green and the Brown Frank Uekötter, 2006-08-14 This study provides the first comprehensive discussion of conservation in Nazi Germany Looking at Germany in an international context it analyses the roots of conservation in the late 19th century the gradual adaptation of racist and nationalist thinking among conservationists in the 1920s and their indifference to the Weimar Republic It describes how the German conservation movement came to cooperate with the Nazi regime and discusses the ideological and institutional lines between the conservation movement and the Nazis Uekoetter further examines how the conservation movement struggled to do away with a troublesome past after World War II making the environmentalists one of the last groups in German society to face up to its Nazi burden It is a story of ideological convergence of tactical alliances of careerism of implication in crimes against humanity and of deceit and denial after 1945 It is also a story that offers valuable lessons for today s environmental movement **Environment, Space, Place: Volume 4, Issue 1 (Spring 2012)** Gary Backhaus, 2012-01-01 Nu s au introdus date The Lure of the North Woods Aaron Shapiro, 2013-03-30 In the late nineteenth century the North Woods offered people little in the way of a pleasant escape Rather it was a hub of production supplying industrial America with vast quantities of lumber and mineral ore This book tells the story of how northern Minnesota northern Wisconsin and Michigan s Upper Peninsula became a tourist paradise turning a scarred countryside into the playground we know today Stripped of much of its timber and ore by the early 1900s the North Woods experienced deindustrialization earlier than the Rust Belt cities that consumed its resources In The Lure of the North Woods Aaron Shapiro describes how residents and visitors reshaped the region from a landscape of exploitation to a vacationland The rejuvenating North Woods profited in new ways by drawing on emerging connections between the urban and the rural including improved transportation promotion recreational land use and conservation initiatives Shapiro

demonstrates how this transformation helps explain the interwar origins of modern American environmentalism when both the consumption of nature for pleasure and the work of the Civilian Conservation Corps in the North Woods and elsewhere led many Americans to cultivate a fresh perspective on the outdoors At a time when travel and recreation are considered major economic forces *The Lure of the North Woods* reveals how leisure and tourism in particular has shaped modern America

The World Beyond the Windshield Christof Mauch, Thomas Zeller, 2008 For better or worse the view through a car's windshield has redefined how we see the world around us In some cases such as the American parkway the view from the road was the be all and end all of the highway in others such as the Italian autostrada the view of a fast efficient transportation machine celebrating either Fascism or its absence was the goal These varied environments are neither necessary nor accidental but the outcomes of historical negotiations and whether we abhor them or take delight in them they have become part of the fabric of human existence *The World beyond the Windshield Roads and Landscapes in the United States and Europe* is the first systematic comparative look at these landscapes By looking at examples from the United States and Europe the chapters in this volume explore the relationship between the road and the landscape that it traverses cuts through defines despoils and enhances The authors analyze the Washington Beltway and the Blue Ridge Parkway as well as iconic roads in Italy Nazi Germany East Germany and Great Britain This is a story of the transatlantic exchange of ideas about environment and technology and of the national and nationalistic appropriations of such landscaping

How Green Were the Nazis? Franz-Josef Brüggemeier, Mark Cioc, Thomas Zeller, 2005 Annotation The first book to examine the Third Reich's environmental policies and to offer an in depth exploration of the intersections between brown ideologies and green practices
