Dictionary of XML Technologies and the Semantic Web Vladimir Geroimenko, 2012-12-06 The emerging Second Generation Web is based entirely on XML and related technologies It is intended to result in the creation of the Semantic Web on which computers will be able to deal with the meaning semantics of Web data and hence to process them in a more effective and autonomous way This new version of the Web introduces a multitude of novel concepts terms and acronyms Purpose Scope and Methods This dictionary is an effort to specify the terminological basis of emerging XML and Semantic Web technologies The ultimate goal of this dictionary is even broader than just to define the meaning of new words it aims to develop a proper understanding of these leading edge technologies To achieve this comprehensible definitions of technical terms are supported by numerous diagrams and code snippets clearly annotated and explained The main areas covered in this dictionary are 1 XML syntax and core technologies such as Namespaces Infoset and XML Schema 2 all the major members of the XML family of technologies such as XSLT XPath and XLink 3 numerous XML based domain specific languages such as NewsML News Markup Language 4 the concept and architecture of the Semantic Web 5 key Semantic Web technologies such as RDF Resource Description Framework RDF Schema and OWL Web Ontology Language and 6 Web services including WSDL Web Services Description Language and SOAP Simple Object Access Protocol *On-line Monitoring Systems and Computer Tool Interoperability* Thomas Ludwig, 2003 Ludwig Institut für Informatik Ruprecht Karls Universität Heidelberg Germany and Miller computer science U of Wisconsin US present five papers examining the construction and methodology of tools for debugging and performance analysis in parallel programs After a review of the past decade's work in debuggers and performance analyzers papers look at a tool infrastructure an operational tool environment for multi thread and multi process debugging and execution visualization multi execution performance tuning and the specification of performance properties of parallel applications using compound events Annotation 2004 Book News Inc Portland OR booknews.com *Advances in Software Maintenance Management: Technologies and Solutions* Piattini, Mario, Polo, Macario, Ruiz, Francisco, 2002-07-01 *Advances in Software Maintenance Management Technologies and Solutions* is a compilation of chapters from some of the best researchers and practitioners in the area of software maintenance The chapters in this book are intended to be useful to a wide audience where software maintenance is a mandatory matter for study **Perspectives of System Informatics** Dines Bjørner, Manfred Broy, Alexandre Zamulin, 2003-06-30 This book constitutes the thoroughly refereed post proceedings of the 4th International Andrei Ershov Memorial Conference PSI 2001 held in Akademgorodok Novosibirsk Russia in July 2001 The 50 revised papers presented together with 2 invited memorial papers devoted to the work of Andrei Ershov were carefully selected during 2 rounds of reviewing and improvement The book offers topical sections on computing and algorithms logical methods verification program transformation and synthesis semantics and types processes and concurrency UML specification Petri nets testing software construction data and

Madhavji, Juan Fernandez-Ramil, Dewayne Perry, 2006-08-30 Evolution of software has long been recognized as one of the most problematic and challenging areas in the field of software engineering as evidenced by the high often up to 60 80% life cycle costs attributed to this activity over the life of a software system Studies of software evolution are central to the understanding and practice of software development Yet it has received relatively little attention in the field of software engineering This book focuses on topics aimed at giving a scientific insight into the aspect of software evolution and feedback In summary the book covers conceptual phenomenological empirical technological and theoretical aspects of the field of software evolution with contributions from the leading experts This book delivers an up to date scientific understanding of what software evolution is to show why it is inevitable for real world applications and it demonstrates the role of feedback in software development and maintenance The book also addresses some of the phenomenological and technological underpinnings and includes rules and guidelines for increased software evolvability and in general sustainability of the evolution process *Software Evolution and Feedback* provides a long overdue scientific focus on software evolution and the role of feedback in the software process making this the indispensable guide for all software practitioners researchers and managers in the software industry Computational Science - ICCS 2008 Marian Bubak, Geert Dick van Albada, Jack Dongarra, Peter M.A. Sloot, 2008-06-25 The three volume set LNCS 5101 5103 constitutes the refereed proceedings of the 8th International Conference on Computational Science ICCS 2008 held in Krakow Poland in June 2008 The 167 revised papers of the main conference track presented together with the abstracts of 7 keynote talks and the 100 revised papers from 14 workshops were carefully reviewed and selected for inclusion in the three volumes The main conference track was divided into approximately 20 parallel sessions addressing topics such as e science applications and systems scheduling and load balancing software services and tools new hardware and its applications computer networks simulation of complex systems image processing and visualization optimization techniques numerical linear algebra and numerical algorithms The second volume contains workshop papers related to various computational research areas e g computer graphics and geometric modeling simulation of multiphysics multiscale systems computational chemistry and its applications computational finance and business intelligence physical biological and social networks geocomputation and teaching computational science The third volume is mostly related to computer science topics such as bioinformatics challenges to computer science tools for program development and analysis in computational science software engineering for large scale computing collaborative and cooperative environments applications of workflows in computational science as well as intelligent agents and evolvable systems Testing Commercial-off-the-Shelf Components and Systems Sami Beydeda, Volker Gruhn, 2005-08-15 Industrial development of software systems needs to be guided by recognized engineering principles Commercial off the shelf COTS components enable the systematic and cost effective reuse of prefabricated tested

parts a characteristic approach of mature engineering disciplines This reuse necessitates a thorough test of these components to make sure that each works as specified in a real context Beydeda and Gruhn invited leading researchers in the area of component testing to contribute to this monograph which covers all related aspects from testing components in a context independent manner through testing components in the context of a specific system to testing complete systems built from different components The authors take the viewpoints of both component developers and component users and their contributions encompass functional requirements such as correctness and functionality compliance as well as non functional requirements like performance and robustness Overall this monograph offers researchers graduate students and advanced professionals a unique and comprehensive overview of the state of the art in testing COTS components and COTS based systems

Future Directions in Distance Learning and Communication Technologies Shih, Timothy K.,Hung, Jason,2006-07-31 This book summarizes theoretical studies and practical solutions for engineers educational professionals and graduate students in the research areas of e learning distance education and instructional designs Readers will find solutions and research directions in this interesting book Provided by publisher
